### OFFICERS OF THE TOWN OF HYDE PARK

FOR THE YEAR ENDING MARCH 7, 1904.

SELECTMEN AND SURVEYORS OF HIGHWAYS: ALONZO W. DUNBAR (Chairman), JAMES F. PRING, JOHN JOHNSTON, EDWIN C. JENNEY, CHARLES E. PALMER.

ASSESSORS:

CHAS. F. MORRISON (Chairman), GEO. W. CHAPMAN, FRANK GREENWOOD.

TOWN CLERK: HENRY B. TERRY. TOWN TREASURER: HENRY S. BUNTON.

OVERSEERS OF THE POOR:

CHARLES LEWIS (Chair)	man),	-	-	$\operatorname{term}$	expires 1906
GEORGE E. HAVEN,		-	-	$\operatorname{term}$	expires 1905
GEORGE W. CHAPMAN,	, -	_	_	$\operatorname{term}$	expires 1904
	RD OF	HEAL	LTH:		
WILLIAM W. SCOTT,	-	-	-	$\operatorname{term}$	expires 1906
WILLARD S. EVERETT	(resign	ned),	-	$\operatorname{term}$	expires 1905
CHARLES F. STACK (Ch	airma	n), 🗍	-	$\operatorname{term}$	expires 1904
*EDWIN M. WALKER (	resigne	ed),	-	term	expires 1904
*BENJAMIN G. BATES,	-	-	-	term	expires 1904

COLLECTOR OF TAXES: RANDOLPH P. MOSELEY.

#### SCHOOL COMMITTEE:

CHARLES G. CHICK,	-		term	expires	1906
WILBUR H. POWERS (	Chairman	n), -		expires	1906
FRED J. HUTCHINSON				expires	
ANDREW WASHBURN		1),		expires	
EDWARD S. FELLOWS				expires	
FRANK F. COURTNEY				expires	
ELLA F. BOYD, -	-			expires	
SAMUEL T. ELLIOTT,	-			expires	1904
EDWARD I. HUMPHRI				expires	
ALVIN D. HOLMES (ch	nosen to fi	ll vacano	cy), term	expires	1904
GILBERT BALKAM (ch	iosen to fi	ll vacano	cy), term	expires	1904

#### SUPERINTENDENT OF SCHOOLS: FRANK O. DRAPER.

\* Mr. Edwin M. Walker was first chosen by the Board of Health and Selectmen to fill the vacancy caused by the resignation of Willard S. Everett. Mr. Walker resigned shortly afterwards and Mr. Benjamin G. Bates was chosen in his stead, to serve until another is chosen by the town.

#### AUDITORS:

# FRED C. STONE (Chairman), WILLIAM J. DOWNEY, FREDERICK G. KATZMANN.

## TRUSTEES OF THE PUBLIC LIBRARY:

CHARLES F. JENNEY,	-	-	-	term	expires 1906
AMOS H. BRAINARD,	-	-	-	$\operatorname{term}$	expires 1906
JOHN W. GRIFFIN,	-	-	-	$\operatorname{term}$	expires 1906
EDWARD S. HAYWARD,		-	-	$\operatorname{term}$	expires 1905
HENRY B. MINER (Chairn	nan),	-	-	term	expires 1905
JAMES R. CORTHELL,	-	-	-	$\operatorname{term}$	expires 1905
CHARLES G. CHICK,	-	- 1 C	-	$\operatorname{term}$	expires 1904
G. FRED GRIDLEY,	-	-	-	$\operatorname{term}$	expires 1904
FREDERICK L. JOHNSON	,	-	-	$\operatorname{term}$	expires 1904

#### CEMETERY COMMISSIONERS:

GEORGE E. WHITING,	-	-	-	term expires 1906
CHARLES F. JENNEY,	-	-	-	term expires 1905
JOHN O'CONNELL, -		-	-	term expires 1904

#### PARK COMMISSIONERS:

LAWSON B. BIDWELL,	-	-	-	term expires 1906
FRANK B. RICH, -	-	-	-	term expires 1905
JOHN J. ENNEKING (Cha	airm	ian),	-	term expires 1904

## BOARD OF SEWER COMMISSIONERS:

CHARLES HALEY,	-	-	term expires 1906
DAVID PERKINS (Chairman), ·	-	-	term expires 1905
WILLIAM U. FAIRBAIRN,	-	-	term expires 1904

#### CONSTABLES:

ROBERT E. GRANT,		OHN M. BROWN,
WILLIAM W. SCOTT,	I	DANIEL O'CONNELL,
WILLIAM K.	PEA	
WILLIAM WRAGG,	-	
CORNELIUS A. COUGHLIN,	-	appointed by Selectmen
FRANK S. NORTON, -	-	appointed by Selectmen
ALEXANDER G. CHILDS,	-	appointed by Selectmen

CHIEF OF POLICE: WILLIAM WRAGG.

#### FIRE DEPARTMENT:

JOHN H. WETHERBEE,		-	-	- Chief Engineer
JOHN C. MCDOUGALD, DENNIS W. MAHONEY,	}	-	-	Assistant Engineers

INSPECTOR OF BUILDINGS: RICHARD F. BOYNTON.

### SELECTMEN'S REPORT.

TO THE CITIZENS OF HYDE PARK:

Your Board of Selectmen present to the citizens of Hyde Park their annual report for the fiscal year ending January 31, 1904.

FINANCE,

The funded debt of the town January 31, 1903, was as follows :

School buildings,	\$ 2,000	
Sewerage,	. 125,000	
Public Library building,	17,000	
High School building,	57,000	
Trescott School building,	16,000	
Furniture and furnishings, High School,	6,000	
		\$223,000

In addition to the interest payments made during the year, \$14,000 of the above has been paid.

Under authority of vote of the town June 22, 1898, and in accordance with Chapter 419 of the Acts of the Legislature for the year 1898, Sewerage bonds to the amount of \$40,000have been issued during the current year, the proceeds from which have been used to retire \$40,000 previously borrowed in anticipation of such issue.

This makes the funded debt of the town January 31, 1904, as follows:

Sewerage,	\$160,000	
Public Library building,	15,000	
High School building,	54,000	
Trescott School building,	15,000	
Furniture and furnishings, High School	5,000	
		\$249,000

During the coming year \$15,000 of the above matures, which will have to be provided for in the tax levy for the coming year.

#### HIGHWAY DEPARTMENT.

Our Board reappointed Clarence G. Norris as Superintendent of Streets. During the year the large amount of work upon our highways has been under his supervision and control. We refer you to the report of the detailed workings of his department found in another part of this report. As a Board we desire to state that Mr, Norris has performed his duties in a manner highly satisfactory to us and as we believe to our townspeop!e.

The supply of gravel in our town for resurfacing or building of streets is practically exhausted. The increased cost of procuring what remains and the poor quality has compelled the town to use crushed stone. We have been enabled to obtain a supply of gravel for the Fairmount and Readville districts from Milton and Dedham, but from these sources the supply available is limited and at no distant day will also be exhausted.

By reason of the construction of the Metropolitan sewer through the easterly part of our town we have been enabled during the last two years to buy crushed stone from the contractors at a reasonable cost. This work having been completed, we are forced to fall back on our only other available source, the ledge on Gordon Avenue leased from year to year from George E Whiting, and which, by reason of the character of its surroundings, can be but a temporary source for such material. Already complaints have been lodged with us that the blasting is annoying to the residents in that vicinity, and in some instances has caused slight damage to their property.

There are two remedies for this condition of things, one is to buy stone already crushed, another for the town to procure a ledge either by purchase or lease remote from the residential section and crush the stone, as we are doing at the present time. We refer this subject to the careful consideration of our successors and the town. The question of what rights corporations, boards of public works, individuals or other parties have to dig up the surface or a part of any public street or way within our town, without first obtaining the authority of the Board of Selectmen and Surveyors of Highways, has been carefully considered, and we are of the opinion that the board at any early date should cause rules and regulations to be adopted and enforced in this matter.

The By-Laws of the town, approved by the Superior Court Jan. 27, 1898, contain the following :

"No person except the selectmen, the surveyors of highways, the sewer commissioners in the lawful performance of their duties, or those acting under their orders, except such other persons as are or may be authorized by statute, shall break or dig up the ground in any street or public way in the town, without first obtaining a written permit from the selectmen; and all persons acting under such permit shall put up and maintain a suitable railing or fence around the part of the street so broken up, so long as the same shall remain unsafe or inconvenient for travellers, and he or they shall keep one or more lighted lanterns fixed to such railing or fence, or in some other way exposed every night from twilight in the evening through the whole night, so long as such street or way shall be or remain unsafe or inconvenient for travellers."

We have considered carefully, under legal advice, this entire question, and desire to set forth in our report a general resume of the question, for future action and enforcement.

Upon an examination of all the provisions of law relative to this subject, except where the rights of the Sewer Commissioners, Tree Warden and County Commissioners are involved, the statutes expressly reserve to the Selectmen a right of reasonable supervision, and in some instances absolutely require their consent, and in others require the work to be done under their direction.

So far as our knowledge extends, the Selectmen have never required any of the corporations using our streets, in cases of repair or otherwise, where it was necessary to dig up the same, to do so under any authority or supervision.

• ÷

It is very clear that unless authorized by law, with the exceptions as above set forth, no corporation, or individual, except perhaps in cases of imminent danger to life and property, have the right to open any street or public way in the town without having first obtained the written permit of the Board of Selectmen.

We recommend the enforcement of the laws in relation to these matters.

#### THE APPROACH TO WEST RIVER STREET BRIDGE NEAR CLEARY SQUARE.

It was suggested early in the past year to our Board that the approach to the West River Street bridge near Cleary Square should be repaired and put in a substantial and permanent condition. The Board considered this question and the probable expense of paving, but before entering into any contract to carry out what seemed to be a permanent improvement upon this much-used way, the question of the expense and the relation of the railroad to this work was carefully considered. The Board found upon investigation that by a decree entered the twenty-fourth day of February, 1883, the following order was made : "That the Boston and Providence Railroad shall carry into effect the aforesaid decision of the County Commissioners, and shall pay the charges and expenses of making the alterations as aforesaid and all future charges for keeping said crossing and approaches thereto in order and repair, including not only the charges and expenses of alterations made by the decree, but all future charges for keeping said crossing and approaches thereto in repair . . . and surfaced with good gravel."

This decree was called to the attention of the railroad authorities, and after submitting the same to counsel, they agreed to pay the sum of four hundred dollars for the repair of this piece of street. Although the decree set forth that the same should be constructed with gravel, the railroad officials arranged that the street should be macadamized like the adjacent highway and paid for the work to be done in that manner. The railroad people informed our Board that they had not been called upon in recent years by the town to make any repairs upon this section of the street. We make this report that the facts may be permanently before our citizens.

#### LINWOOD STREET.

At a town meeting held December 9, 1903, the town voted to lay out Linwood Street as a public town way in accordance with plans which had been approved and the layout which was recommended to the town by the Selectmen. To carry out this work the town appropriated the sum of four hundred (400) dollars and transferred this amount from the current year's highway appropriation. This work will be carried out at an early date.

#### KNIGHT STREET.

In the last annual report of this Board the question of the acceptance of Knight Street as a public way was considered. It has long been recognized that it would be of great convenience to the public if this short street was open for general use, and in recognition of this situation the Selectmen at an early date caused to be prepared plans to carry out this work. We met in conference with the only parties who would be affected by this work as abuttors, The Manchaug Company or their representatives, and a hearing was held at our office to consider the proposed layout. At first said corporation was favorable to our going across substantially where the present Knight Street is constructed, but after further consideration they determined that they would not consent to our building this street as a public highway unless the same was constructed entirely across what is now the Cotton Mill Pond. This work, upon estimation, we found would cost the town in the vicinity of \$50,000, and we

did not, under the circumstances, think it proper to call upon the town at that time, with other public works going on, for this appropriation. If the street was built as a public way over the present Knight Street it would involve the construction of at least two new bridges, which in itself would be quite an expense, even if the abuttors were favorable to our taking the street as a public way. We refer this entire matter to the consideration of the town at some future time,

#### NEW DAMON, REGENT AND WATERLOO STREETS.

In the last annual report this Board presented to the consideration of the town the conditions which prevailed upon New Damon, Regent and Waterloo Streets, in the Readville section.

The town has taken no action, up to the present time, concerning the acceptance of these streets. Said streets are important in the development of this section, as they are adjacent to and near the new Sturtevant Blower Company's works, which are nearing completion. In order to carry off the surface water from these streets and vicinity it will be necessary to make some connection with Readville Street drain, hereinafter referred to. Before this action can be taken we deem it necessary that the town should accept one or all of these streets as public highways, and we recommend to our successors the urgency of this question.

#### READVILLE STREET.

It has been long recognized that some action should be taken by the town to permanently construct Readville Street. The condition in which said street has been suffered to remain for many years has been a great source of inconvenience to citizens in that vicinity and has been subject to the criticisms of our town officers. This matter was brought before the town for a direct appropriation last year, and upon consideration, as the town sewer had not been constructed in the street at that time, the town voted to indefinitely postpone the article. Our Board of Sewer Commissioners, since that time, recognizing the necessity of this work, have, during the past year, caused a sewer to be built the entire length of this street. This work was done so late in the year that our Board did not deem it proper to do anything further until the street had become thoroughly settled. The advisory committee, hereinafter, referred to, have recognized, upon our recommendation, the necessity of such permanent construction, and make a report based upon the supposition that this street is to be constructed the coming year.

#### READVILLE STREET DRAIN.

At a town meeting held December 9, 1903, the town voted as recommended by the Selectmen to lay out and construct a public drain from a point on old Damon Street to Mother Brook, a distance of about five hundred (50C) feet, along and over land owned by the Sturtevant Blower Company and The Manchaug Company. The necessity of this work was made manifest from the 'act that it was a part of the drainage system for Readville and adjacent streets. Readville Street can not be drained nor built until this main drain is constructed, neither can New Damon, Regent and Waterloo Streets be constructed until such time as this main drain is built so as to receive the surface drainage from this territory. As explained to the town, the Selectmen consider the necessity of the future needs of this territory and they have caused this work to be commenced and anticipate the completion thereof at an early date. To carry out the expense of the construction of the Readville Street main drain the town appropriated the sum of \$1,450, which amount was transferred from current year's highway appropriation.

#### GARFIELD STREET DRAIN.

Our predecessors have had presented to them for several years the question of the surface drainage in the vicinity of

Washington and Loring Streets and Garfield Avenue. In many instances the surface water from these streets has been suffered to flow upon private land and in some cases has caused people to complain, with justice, that their cellars and land were receiving the surface water from the town highways.

We caused the necessary surveys to be made to see what could be done to relieve this embarrassing situation. Upon investigation we found that there was in existence an old drain from Water Street to the Neponset River, commencing at a point near the intersection of Garfield Avenue and Water Street.

The town voted December 9, 1903, upon the recommendation of the Selectmen, to appropriate the sum of \$2,300 for the purpose of building and draining this territory. This amount was transferred by the town from the curreut year's highway appropriation. The work, under this vote, was duly commenced and will be completed at an early date.

#### GLENWOOD STATION CROSSING.

In the last annual report the Selectmen called the attention of the town to the fact that a crossing over the railroad at Glenwood Avenue on the New England Division was necessary. At the town meeting which was held December 9, 1903, the town voted to appoint a committee to consider this entire question and make its report at a future town meeting. We are informed that the committee has given attention to this proposed work and will present their report to the town for consideration at an early date.

#### PERAMBULATION OF BOUNDARY LINES.

Perambulations were made as required by statute during the past year of boundary lines between our town and the town of Milton. Representatives of each town were present and went over the boundary lines between the respective towns as required by law. The question of the placing in position of a new boundary stone between this town and Milton, on Beacon Street, was considered and it was voted that such a stone be prepared, and action thereon will be taken immediately. Following is the report:

We, the undersigned Selectmen of Milton and Hyde Park, met by appointment this tenth day of October, 1903, to perambulate the line between Milton and Hyde Park, beginning at a point in the centre of the Neponset River, opposite a stone post located on the easterly bank of said river on the boundary line between the Towns of Milton and Canton and marked M. C., thence easterly and northerly by the centre of said river to a point opposite a stone post marked M. HP., on land of the Commonwealth, formerly of Van Brunt; thence easterly to a stone post on Dana Avenue marked M. HP., thence easterly to a stone post on Williams Avenue marked M. HP., thence easterly to a stone post on Fairmount Avenue marked M. HP., thence easterly to a stone post marked M. HP. on land of Skinner, near the reservior of the Hyde Park Water Company; thence northerly to a stone post on Metropolitan Avenue marked M. HP., thence northerly to a stone post on land of Whiting marked M. HP., thence northwesterly to Beacon Street, where we this day voted to erect a stone post marked M. HP, thence northwesterly to a stone post on the easterly bank of the said Neponset River.

JOHN F. BROWN, MAURICE A. DUFFY, ALONZO W. DUNBAR, EDWIN C. JENNEY, CHARLES E. PALMER, Majority of Selectmen of Hyde Park.

#### OLD COLONY STREET RAILWAY.

When the Boston Elevated Railway Company began, in July last, to operate over the tracks in Boston of the Old Colony Street Railway Company, serious trouble was at once caused by reason of the unsatisfactory service rendered, and because many transfers, formerly issued at Cleary Square, were abolished. The rates of fares and operation of cars were also so readjusted as to render a continuous trip impossible between Hyde Park and Milton Lower Mills, and also put in force a double fare between those points. Similar inconveniences and loss of transfer and other privileges were also suffered by the citizens of Dedham.

The Selectmen immediately proceeded to consider these matters and to take action to protect the interests of our citizens as far as possible. The matter of transfers was taken up with the officials of the Old Colony Street Railway Company, who were advised that the Selectmen intended to proceed, if necessary, to promptly bring the matter before the Railroad Commissioners. On the 10th day of July, 1903, the transfers from Cleary Square were re-established by the Company, but the service continued unsatisfactory and the double fare to Milton Lower Mills still remained in force. The latter difficulty could not be remedied except with the co-operation of the Boston Elevated Railway Company. A petition was presented to the Railroad Commissioners complaining of the increase of fares and the failure to furnish reasonable and proper accommodations and a continuous trip to Milton Lower Mills. The Town of Dedham at the same time presented a petition complaining as to the abolition of its transfer privileges and school tickets in Dedham and as to accommodations furnished. A joint hearing was held on these petitions in July last, and the decision of the Commissioners upon the same reserved. In November the Board sent down its decision, from which we quote :

"The irregularities and delays in service, with overcrowding of cars, of which complaint has been made, have been largely, if not wholly, due to the great increase of travel, which has proved too large for the safe operation of a single track railway. To remedy this the Board has approved a double track construction in streets which we ordinarily consider too narrow for two tracks. The exception has been made as a measure for safeguarding the public under the peculiar circumstances of this case. Nearly all of the additional track has been laid, and we are confident that with the completion of this improvement a satisfactory service will be given."

The poor service, however, still continues, but may be

relieved considerably upon the completion of the double track between Forest Hills and the Hyde Park line, Until this is done it is difficult to tell what the ultimate result of the lease will be upon travel on this line. Further application to the Commissioners may be necessary.

The Commissioners referring to the double fare to Milton Lower Mills, state that a route with a single fare will be furnished as soon as the newly-constructed tracks in Blue Hill Avenue are connected with the rest of the Old Colony system at Mattapan, and state that the completion of this track is waiting only the granting of location for connecting curves in Milton. We hope that this work will also be completed in the spring. Up to this date the citizens of Dedham have been unable to secure a return of the transfers abolished at the time when the lease took effect.

In 1898 a statute was passed establishing an excise tax on a percentage of the gross receipts of street railway corporations, which tax was apportioned according to the length of track operated in public ways. The statute further provided as follows :

"Street railway companies shall not be required to keep any portion of the surface material of streets, roads and bridges in repair, but they shall remain subject to all legal obligations imposed in original grants of locations."

The Old Colony Street Railway Company claims that under this statute it is not compelled to keep any portion of the streets in repair, although the original location in Hyde Park provided that the Norfolk Suburban Street Railway Company, its predecessor in title, should keep the portions of the streets and highways included between its tracks, and for a distance of eighteen inches outside thereof, at all times flush with the top of the tracks, and in repair to the satisfaction of the selectmen. Early in October, citizens petitioned the selectmen, representing that public safety and convenience required that the tracks and roa lbed of the railway company be reconstructed by replacing T rails, where the same are now in use, with girder rails, and by paving between the rails and for eighteen inches outside thereof. The original location of the Norfolk Suburban Street Railway Company provided that it should reconstruct its track and roadbed by laying down such different material therefor as the selectmen, after public hearing, adjudged that public safety and convenience required.

On this petition, the selectmen issued an order for a public hearing to be held on November 11th, and on that date such hearing was had. The Old Colony Street Railway Company appeared by counsel and claimed that it was relieved from the obligation of reconstruction, paving, and repair by the statute of 1898, that the selectmen had no right to put such requirements in the original location granted to the Nofolk Suburban Street Railway Company, and that the same were illegal and of no binding effect.

At the close of this hearing, the matter was taken under advisement, and the selectmen, believing that public safety and convenience did require the reconstruction of the tracks and roadbed of said Company, and that it should if possible be obliged to comply with the original stipulations voluntarily accepted by its predecessor in title, on December 19, 1903, passed an order of which the following is a part:

Ordered and decreed, and the Board of Selectmen do hereby adjudge that public safety and convenience require that said Old Colony Street Railway Company shall reconstruct the track and roadbed, now maintained and operated by it as the successor in right and obligation under the original location granted to the Norfolk Suburban Street Railway Company by the Selectmen of said Hyde Park and dated March 3, 1893, in the manner following, to wit: by reconstructing said track with new girder rails weighing not less than ninety pounds to the yard and not less than sixty feet in length, and by paving the part of the streets occupied by it under said original location between its tracks and for a distance of eighteen inches outside thereof on both sides, with paving stones equal to the best quality of Quincy granite, not less than ten or more than twelve inches in length on the surface when set; not less than three and one half or more than four inches in width on the surface when set, and not less than seven or more than eight inches in depth from the surface when set, to be laid with plenty of clean, sharp paving gravel well covered off with the same quality of gravel, using in said reconstruction sleepers of chesnut or hackmatack. All of said reconstruction hereby ordered shall be done to the satisfaction of the Board of Selectmen for the time being. No reconstruction shall be required under this order where the present construction conforms to that prescribed in this order.

It is further ordered and decreed by the Board of Selectmen that the parts of said reconstruction hereby required on River Street between Everett Square and West Street, and on Hyde Park Avenue between River Street and Arlington Street, be completed within sixty days from this date and that the reconstruction of the remainder of said tracks and roadbed be within such time or times as may hereafter be determined by this board, or its successors in office.

And whereas said Old Colony Street Railway Company has not kept the portion of the streets and highways included within said original location in repair between its tracks and for a distance of eighteen inches outside thereof, and at all times flush with the top of its tracks, now therefore, it is

Ordered, that such legal preceedings as may be deemed necessary or advisable, be taken for the purpose of determining and enforcing the obligations of said Old Colony Street Railway Company under said location, and for the purpose of compelling it to keep and perform the terms of said original location as to the keeping said portions of the streets and highways last hereinbefore referred to, in repair and at all times flush with the top of its tracks.

The time limit placed in this order had at the time of writing this report not elapsed, but it is evident that the Railway Company do not intend to comply with the same except under order of the court. A petition will be filed in the Supreme Judicial Court to have this order carried into effect. This is a matter of much importance, and while the statute of 1898 has not as yet been construed in a similar case, the selectmen believe the interests of the town require a test case to be made. In case the application does not meet with success, the town will be in no worse position than it is at present, and if successful, the result will be of great benefit not only to the town in its corporate capacity, but to all citizens.

·2

#### BLUE HILL STREET RAILWAY COMPANY.

The directors of the Blue Hill Street Railway Company petitioned our Board previous to October I, 1903, that the time granted in their charter for the operation of their road be extended for one year. Upon consideration of the entire question the Board voted to extend the time to November I, 1903. Previous to the expiration of the thirty days, as above set forth, we were again petitioned to extend the time for one year. The Selectmen granted the petitioners a hearing in regard to the matter, and upon careful consideration the Selectmen refused to extend the time for the operation of this road. So far as our Board is concerned, no other action has been taken in relation to the operation by this company of this part of their system.

#### POLICE DEPARTMENT.

Our police force during the past year has been under William Wragg, as Chief of Police, with Robert E. Grant as Lieutenant, together with James A. Cullen, Elmer P. Runnells, Andrew W. Henderson, George H. Tucker, Elbredge H. Dyer, Edward J. Welch, Alexander Herring and Robert M. Sampson, with many special officers assigned for Sunday work and other special duties. A detailed report of this department is to be found in another part of this report. We commend this department for the efficient and satisfactory manner in which they have carried on their work.

#### FIRE DEPARTMENT.

The Selectmen appointed the engineers for our fire department for the current year, John H. Wetherbee, John C. McDougald and Dennis W. Mahoney. The engineers duly organized with the choice of John H. Wetherbee as chief, The detailed report of this department, by our engineers, is to be found elsewhere in this report. We desire to thank this department in the name of the town, for their faithful service,

#### INSPECTOR OF BUILDINGS,

By a vote of our Board, Richard F. Boynton was appointed Inspector of Buildings, for the current year, and we refer to his report for the detailed working of his department.

#### JURY LIST.

The Selectmen present to you with this annual report a list of jurors prepared for submission to the town at our town appropriation meeting, for the ensuing year. The list is published in the town report at the present time in compliance with the law.

#### ADVISORY COMMITTEE.

The Selectmen realizing that in many large towns, either under by-law or otherwise, a warrant committee or other public body of citizens were appointed annually to consider appropriations and other public matters. Having no such by-law, it was impossible for us to have such a committee appointed under authority of law; but the Selectmen, recognizing the public desire to ascertain, by close study, the needs and requirements of our various town departments, assumed the responsibility, and on the 29th day of December, 1903, passed unanimously the following vote: "That a committee of fifteen be appointed by this Board to act in connection with the Board of Selectmen and the Town Treasurer, together with the Chairmen of the following Boards, viz.: School Committee, Public Library Trustees, Board of Health, Overseers of the Poor, and the Board of Assessors, to consider the question of our municipal obligations; the administration of our various departments; the coming year's annual appropriations; property values and assessments; also to make such report and recommendation to the town concerning the administration of any and all departments that the circumstances and requirements may justify."

At the first meeting of the committee appointed under authority as above set forth, it was voted to increase the membership by adding nine citizens to such committee and that said new appointees be chosen by a sub-committee, which action was duly taken. The full committee as above constituted have had a large number of meetings, including a public one. Various sub-committees have considered the needs and requirements of our various departments as far as appropriations for the coming year were considered, and other matters.

A partial report of this committee and their work, together with their recommendations to the town, to be presented at the next annual appropriation meeting, is herewith presented, and we chcerfully indorse and refer our citizens to the same.

#### ACTIONS AT LAW.

Sawtelle v. Hyde Park, the last of the fifty-one petitions for land damages growing out of the abolishment of grade crossings, more fully described in previous annual reports, and pending in the Supreme Judicial Court at the date of the last report, was subsequently settled by payment to the plaintiff of \$1,000, without costs, and the case was disposed of by an entry on the court records to that effect in February, 1903.

Peter Rogers v. Hyde Park, suit on account of personal injuries, more fully described in previous reports, is still pending in the Superior Court. The case is in order for trial on the present January trial calendar.

Catherine E. Stanford v. Hyde Park, action for personal injuries caused by an alleged defect in the highway on the northerly side of River Street near Monponset Street, more fully described in previous reports, was tried before a jury in February, 1903, in the Superior Court, and a verdict for \$1,250 rendered for the plaintiff. The case is now pending in the Supreme Judicial Court on exceptions by the town, and is in order for argument on the present January calendar of that court.

Thomas Rooney v. Hyde Park, action of tort arising from alleged defect in the highway in Damon Street, more fully described in previous annual reports, was tried before a jury in the Superior Court last May. Verdict for the town, and judgment entered thereon.

The cases of Mary D. Hammond v. Hyde Park, and J. Forest Hammond v. Hyde Park, minors, two actions for alleged unlawful expulsion and exclusion from the public schools of the town, more fully described in the last annual report, were tried together in the Superior Court last May, and again in the following November, each trial resulting in a disagreement of the jury. Our citizens have manifested great interest, and continue to do so, in these causes growing out of the action of the school committee at the time of the small-pox epidemic in the winter of 1901-2. The cases are on the present January trial calendar of the court.

Joseph J. Dunn v. Hyde Park, more fully described in the last annual report, is pending in the Superior Court, on demurrer by the town.

Philip Rosenberg v. Hyde Park, action for personal injuries alleged to have been received by plaintiff being thrown from his wagon by a collision with a wooden horse in the highway on Hyde Park Avenue, pending in the Superior Court at the date of the last report, when reached for trial in December, 1903, was nonsuited, and was thus disposed of.

The petition of Alonzo W. Dunbar, et al., selectmen, against the New York, New Haven & Hartford Railroad Company, et al., for the abolition of the grade crossings at Fairmount Avenue and Bridge Street is still pending. Several hearings have been held before the Commissioners appointed by the Superior Court, and it is expected that these hearings will soon be closed.

An action has been brought by William L. Holmes against the Board of Health to recover damages caused by an alleged wrongful removal of the plaintiff from the building where he was staying under claim that he had the small-pox. Mr. Holmes claims that he did not have the disease and that the Board of Health was negligent and did not act with good faith in endeavoring to ascertain the true cause of his sickness. The Board of Health claims that whatever was done by it was done in good faith after having proper medical examination and advice and that whatever was done was done because the protection of the public demanded it.

George A. Tillson has brought suit against the town in the District Court of Northern Norfolk, setting his damages at \$900, claiming that he has received injury by reason of a defect in Hyde Park Avenue, near Kennedy's Block. This case probably will be tried within a few weeks.

Andrew Roman has also brought suit against the town to recover damages claimed by him to be \$4,000 for an alleged defect in Metropolitan Avenue, between East River and Westminster Streets. This action is returnable on the first Monday of February in the Superior Court for this County.

Ethel A. L. Smith of Hyde Park, a minor, has sued the town. claiming damages of \$10,000, alleging that she was wrongfully excluded from school during the existence of small-pox in the town. This action was returnable on the first Monday of May last, but has not been upon the trial list and may not be tried until the final disposal of the cases of Mary D. Hammond and others against the town, which are of somewhat the same character as this case.

In September last the Selectmen petitioned the County Commissioners for an order to compel the New England Railroad Co. and the New York, New Haven & Hartford Railroad Co., its lessee, to comply with the original decree, passed in April, 1865, as to the construction of the approaches to the highway bridge over said railroad in the East River Street District. A contested hearing was had upon said petition before the County Commissioners and the Commissioners reserved their decision. The railroad companies claimed that the old decree had so far lapsed that proceedings could not now be instituted to compel its enforcement and there was also considerable controversy and doubt as to whether the original decree required a width of 30 feet including sidewalks, or 30 feet exclusive of sidewalks. The railroad companies finally agreed to construct the approaches to the full 30 feet ordered by the original decree and to build one sidewalk within that distance; and, after careful consideration, in view of the many difficulties both of construction and enforcement of the original decree, this proposition was accepted and the work has been substantially completed.

> ALONZO W. DUNBAR, JOHN JOHNSTON, JAMES F. PRING, CHARLES E. PALMER, EDWIN C. JENNEY,

Selectmen and Surveyors of Highways of Hyde Park.

## REPORT OF THE ADVISORY COMMITTEE APPOINTED BY THE SELECTMEN.

TO THE CITIZENS OF HYDE PARK:

On the 29th day of December, 1903, the Board of Selectmen passed the following vote: "That a committee of fifteen be appointed by this Board to act in connection with the Board of Selectmen and the Town Treasurer, together with the chairmen of the following Boards, viz.: School Committee, Public Library Trustees, Board of Health, Overseers of the Poor, and the Board of Assessors, to consider the question of our municipal obligations; the administration of our various departments; the coming year's annual appropriations; property values and assessments; also to make such report and recommendations to the Town concerning the administration of any and all departments as the circumstances and requirements may justify."

At the first meeting of this committee, held on Friday evening, January 1st, it was voted to add nine citizens, none of whom should hold town office, to the committee, thus making thirty-five members. Organization was effected by the election of Francis W. Darling, Chairman, and William E. Norwood, Clerk. The full committee consists of the following gentlemen:

A, W. DUNBAR, CHAS. E. PALMER, JOHN JOHNSTON, JAMES F. PRING, J. G. McCARTER, WILLIAM E. NORWOOD, CHARLES HALEY, GEO. JEFFERS,

EDWIN C. JENNEY,	W. H. NORRIS,
HENRY S. BUNTON,	W. D. PRESTON
W. H. POWERS,	D. W. MURRAY,
CHARLES LEWIS,	L. P. HOWARD,
CHAS. F. STACK,	E. S. HATHAWA
HENRY B. MINER,	J. S. COVENEY,
C. F. MORRISON,	F. J. KENNEDY,
W. J. W. WHEELER,	L. P. WINCHENI
ALBERT DAVENPORT,	GEORGE B. DO
F. N. TIRRELL,	OSCAR BURSCI
JAMES A. TILDEN,	ALFRED FOST
J. F. LOCKWOOD,	G. H. HASKELL
E. L. BARRETT,	W. H. HARLOW

ON. AY, RD, WAY. EY, DY. ENBAUGH, DOWLEY, SCH. STER, ELL. OW.

FRANCIS W. DARLING.

This committee, having duly considered that portion of the investigations intrusted to them having reference to the appropriations of the Town of Hyde Park for the current municipal year, beg leave to make, in part, the following report.

The committee realized that a grave defect in the conduct of our municipal affairs, was the method of making the annual appropriations. No information of the amounts to be recommended was to be obtained by the citizens until the evening arrived. Thus there was no opportunity for investigation, and it is fair to say that only the most general and often the most meagre information was to be obtained at the meeting. We think that the impression, however, was very general and reassuring that all of the proposed appropriations had been carefully scrutinized and approved by the Board of Selectmen. It will be news to most citizens, we think, as it was to most of us, that as a rule the other Boards have submitted no figures to the Selectmen until the latest possible moment when the aggregate sums could be printed for circulation at the meeting. This does not refer to the estimates for the fire and police departments, which are under the immediate jurisdiction of

25

the Selectmen. We realize that the other boards of our town government, elected by the people, are not subordinate to the Selectmen, but co-ordinate boards with circumscribed but supreme powers. Yet it seems to your committee that all boards, including the Selectmen, should submit their estimates to some authority for examination and possible revision, sufficiently early in advance of the appropriation meeting to enable some responsible body outside of their own membership to discuss the facts intelligently there. It was presumably on account of this defect in our town's system of finance, which had been the cause of our excessive tax-rate in 1903, as well as on account of the rate itself, that the Board of Selectmen appointed our committee. We felt that whatever the results at which we arrived, they should, if possible, be spread before the citizens sufficiently early to enable them, before the meeting, to become familiar with our conclusions, and, to some extent at least, the conditions which seemed to us to warrant them. In order that this distribution should be as complete as possible, we publish the results of our labors, in this direction, in the Town Report. We have also expressed to the Board of Selectmen the sense of this committee that provision be made, in the warrant of the next appropriation meeting, for the appointment of a similar advisory committee for the coming year.

The committee appointed by the town to investigate and report upon some new form of town government may evolve some better method to accomplish the desired result; but, until such method is made practicable and acceptable, we urge the adoption of our suggestion above.

At its first meeting, your committee asked the chairmen of all boards requiring annual appropriations to prepare and submit to us at once their estimates of expenses for the coming year. This request was cheerfully and promptly complied with, and it is fair to state that each board realized as fully as did your committee, the need of economy in expenditure, and the estimates submitted were, in almost every case, less than the sums appropriated for last year. The additional assurance was given to your committee that if, in its judgment, after careful investigation, the estimates should be still further reduced, the boards would cheerfully acquiesce. We assured them all that we should be guided in our action by no spirit of economy that would in any way impair the efficiency of their departments, and we wish to impress upon all citizens that we have kept this assurance at all times in view, and that, if our recommendations are adopted, no board of our town government will be hampered in the proper discharge of all its duties.

Each estimate as made was at once referred to a subcommittee for careful investigation, and the recommendations of these sub-committees have been the basis upon which our report is made.

In the matter of requirements for bonds, notes and interest, these being fixed and obligatory charges, the amount required, as stated by the Town Treasurer, twentyfive thousand dollars, is approved. This is the same in the aggregate as last year.

The amount appropriated last year for a new steamroller (\$2,650) and the Police Signal System (\$3,750) are of course unnecessary this year.

The amount required for salaries will presumably be the same as last year, viz: -\$5,685, as also the amount for the Grand Army Post, viz.: -\$200.

There was also appropriated last year the sum of \$6,900 to pay for moneys voted in 1902 to be paid from the tax-levy of 1903. No such moneys were appropriated in 1903 to pay from the tax-levy of 1904.

Last year the sum of \$350 was voted to be expended in the patriotic observance of the Fourth of July. We recommend that no money be so appropriated by the town this year.

We come to a consideration of the requirements of the several boards of the town government. The board requiring the largest appropriation is the Board of Selectmen.

The amounts voted last year were :

D
D C
D C
D C
C
- \$86,00 <b>E</b>

We recommend the following appropriations for these purposes for the present year :

Highways,	22,000
Incidentals,	IO,000
Police,	II,20I
Fire Department,	11,700
Street Lighting,	10,850
Street Watering,	4,500

We also recommend that the sum of two thousand dollars be transferred from the amount now in the hands of the Town Treasurer and received by him on account of excise and street railway franchise tax, to the Board of Selectmen for use upon the highways. This will give the Board the sum of \$24,000 for the purpose, and in the aggregate will make a reduction of over \$16,000 in the taxable requirements for all departments under the present authority of the Selectmen. This reduction is large, but it meets with the full approval of the present Board, and we can safely say that the efficiency of the several departments, as at present maintained, will not be reduced or injured.

In considering the appropriation for streets, and that, for the use of the Board of Health for the collection of ashes and garbage, we were impressed with the evident lack of economy in a system which permitted two town boards to maintain separate establishments for work which could even more satisfactorily be performed by one. At the present time, the Board of Health collects the ashes and garbage with an equipment under its own charge in a stable rented for the purpose. The expense of this system thus administered by this Board is not far from six thousand dollars per year. We believe the work should be put under the management of the street department and that a saving will result from such transfer. We also recommend that, in connection with the collection of garbage, the Selectmen shall advertise for bids, as is done in neighboring towns, and if in their judgment a contract can be made promising a saving in expense and satisfactory service, that they make such contract, otherwise that they continue to collect with the town teams. We recommend that there be appropriated for the use of the Board of Selectmen for the work thus transferred the sum of \$5,300.

The Board requiring the next largest expenditure is the School Committee. The appropriations for this department last year were \$55,600, including \$2,000 expended for plumbing at the Fairmount School. The committee intend this year to expend about the same amount on the Greenwood School for plumbing as was expended last year on the Fairmount. This action is approved by the Advisory Committee on condition that the amount so expended be taken from fines collected from defendants in criminal cases, and if such amount be not sufficient that the balance be taken from the department's incidental fund. We further recommend that, if an additional teacher be needed at the Trescott School, as advised, one be transferred from the Amos Webster School, and if a teacher is needed elsewhere, transfer should be made from the Damon or Fairmount. We recommend that no additional teacher be provided for the High School. We also recommend that the industrial school be discontinued. We recommend that the head-master of the Damon School be given an additional salary of one hundred dollars.

Under these conditions, which meet the full approval of the School Committee, we recommend the appropriation for Schools of \$52,200, being \$3,400 less than last year.

The next department to be considered is that of the Overseers of the Poor. The expenditures of this department are mainly in the nature of fixed charges which must be paid. On account, however, of the fact that hereafter the insane poor are to be cared for by the state, instead of the town as heretofore, we recommend an appropriation for this department of \$8,200, a decrease of \$1,800 from last year. The department approve this recommendation.

The next department is that of the Board of Health, This department last year had an appropriation of \$6,800, which was not sufficient to meet its expenses, there being a deficiency in the business year of somewhat over one thousand dollars. This deficiency must, of course, be provided for. On account of the transfer which we have recommended of the collection of ashes and garbage to the street department, we advise the appropriation of \$1,400 for the Board of Health. which should be sufficient to meet its requirements for the year. We further recommend that the sum of \$1,143 be transferred from funds now in the hands of the Town Treasurer and received by him from the State on account of small-pox expenditure, to the Board of Health to cover the deficiencies in the department during the past year. These recommendations meet the approval of the Board,

For the Public Library we recommend the appropriation

of \$3,800, being \$200 less than last year, with the full approval of the Board of Trustees,

A comparative statement of the amounts appropriated last year to be raised by taxation and those advised by us as above for the current year, is as follows:

	1903.	1904.
Selectmen,	\$86,300	\$70.251
(Transfer trom Board of Health)		5,300
Schools,	55,600	52,200
Poor,	10,000	8,200
Health,	6,800	1,400
Library,	4,000	3,800
Bonds, Notes and Interest,	25,000	25,000
Salaries,	5,685	5,685
Grand Army,	200	200
Fourth of July,	350	
Voted in 1902 payable in 1903,	6,900	
Police Signal System,	3,750	
Steam Roller,	2,650	
	\$207,235	\$172,036

This is a reduction of \$35,199.

There are two matters not considered above which will have a bearing on the tax rate. These are, first, the State and County taxes and Metropolitan District charges, which will probably be somewhat larger than last year, and, second, the increase in taxable property. The latter should certainly more than offset the former and leave the entire decrease in appropriations noted above, which is about one-seventh of the total requirement last year, to apply to the tax rate.

In closing, we beg to state that in all the work of this committee, we have had the hearty co-operation of all departments, and, in our ultimate findings, their approval. It is also a great pleasure to be able to say that the recommendations herein made were adopted by this Committee without dissent.

For the Citizens' Advisory Committee.

FRANCIS W. DARLING, Chairman. WILLIAM E. NORWOOD, Clerk.

\* Declared elected.

"Shall licenses be granted for the sale of intoxicating liquors in this town?" Yes 563; No 1047.

The following were chosen, by *viva voce* vote, to the office set against their names :

Bartholomew B. Kivlin, Jotham C. Rockwood, Bartholomew B. Kivlin, Jotham C. Rockwood, Henry V. Harwood, Bartholomew B. Kivlin, Pound Keeper.

Adjourned at 10.30 P.M.

On March 25th, 1903, a town meeting was held in Waverly Hall, when the following articles were acted upon :

ART. 1. To choose a moderator to preside at said meeting.

Charles G. Chick, Esq., chosen.

ART. 2. To see if the town will accept the list of jurors as prepared by the Selectmen and posted according to law. The list was amended and accepted.

ART. 3. To hear the report of the Selectmen in regard to guide boards, and act thereon.

Report made and accepted.

ART. 4. To see what disposition the town will make of the money received from dog licenses in the year 1902.

Given to the public library for purchase of books.

ART. 5. To see if the town will appropriate the money now in the hands of the Treasurer, received by him as sidewalk, street or Board of Health assessments or betterments, and all money which shall be received by him the current year on account of such assessments or betterments, for the purpose of constructing or repairing public ways.

So appropriated.

ART. 6. To see if the town will appropriate the movey to be received this year by the Town Treasurer for or on account of Corporation and National Bank Taxes for the payment of the fire hydrant service of the town.

So appropriated.

ART. 7. To see if the town will authorize its Collector of Taxes to use all means of collecting the taxes which a Town Treasurer, when appointed a collector, may use.

So authorized.

ART. 8. To see if the town will authorize its Treasurer, with the approval of the Selectmen, to borrow money to renew or replace any loan or loans.

So authorized.

ART. 9. To see what compensation the town will vote • to pay for collecting its taxes and other assessments levied the current municipal year.

Same as last year, \$1500.

ART. 10. To fix the salaries of the town officers for the current municipal year.

Selectmen, \$200 each; Assessors, \$300 each; Overseers of Poor, \$150 each; Town Clerk, \$250; Town Treasurer, \$600; Board of Health, \$100 each; Auditors, \$25 each; Cemetery Commissioners, \$50 each; Sewer Commissioners, \$100 each. All other town officers to be paid "same as last year." ART. 11. To determine what compensation shall be allowed the Clerk of the Board of Sewer Commissioners for the ensuing year.

Same as last year, \$600.

ART. 12. To see what compensation the town will vote to pay the Secretary of the Board of Assessors, and for extra clerical services for the Board, for the current municipal year.

Secretary, \$250; and for extra clerical services the same as paid last year.

ART. 13. To fix the compensation of the engineers and the several members of the fire department for their services the current municipal year.

Chief Engineer, \$175; Two Assistant Engineers, \$150 each; for "Permanent Men," \$900 each; "Call Men," \$100 each.

ART. 14. To see what discount the town will vote to allow on all taxes paid on or before October 1, 1903; and what interest the town will vote to charge on taxes for the current year when the same shall be overdue.

No discount allowed; interest at rate of five per cent per annum on overdue taxes.

ART. 15. To see if the town will appropriate two hundred dollars to Post 121, Grand Army of the Republic, for the expenses of decorating the graves of deceased soldiers.

So appropriated.

ART. 16. To hear the reports of any outstanding committees, and act thereon.

The report of the committee on "police signal system" was presented in writing (see report on file). Voted that the report be accepted and its recommendations adopted.

The report of the committee on "municipal coal yards" was presented in writing (see report on file). Voted that "this report be received and placed on file for future reference." ART. 17. To see if the town will authorize its Selectmen to contract with the Hyde Park Electric Light Co., for the remainder of the term of our street lighting contract, for two arc lights to be placed on East Milton Street.

So authorized.

ART. 18. To see if the town will authorize the Selectmen to purchase a new steam road-roller and appropriate money therefor.

\$2,650 appropriated therefor.

ART. 19. To see what sum of money the town will appropriate for a police signal system for the town.

\$3,750 appropriated therefor.

ART. 20. To see what sum of money the town will appropriate for the celebration of the fourth day of July next.

\$350 appropriated therefor.

ART. 21. "To see if the town will appropriate a sum not exceeding \$950 to reslate and repair the roof of the Grew School."

So appropriated.

ART. 22. "To see if the town will appropriate a sum not exceeding \$2,000 to put in sanitaries, change the plumbing, and make the necessary connection with the sewer at the Fairmount School, and how the same shall be raised."

Sc appropriated.

ART. 23. To see what action the town will take concerning the widening of East River Street, near the River Street Station, to appropriate money therefor, and how the same shall be raised.

Indefinitely postponed.

ART. 24. To see what amount the town will vote to raise by taxation to meet the expenses of the town the current year, the deficiences of last year, and the notes and bonds of the town maturing the present year, and how the same shall be appropriated.

Voted to raise by taxation the current year the sum of two hundred and seven thousand two hundred and thirty five dollars (\$207,235.00), and to appropriate the same as follows :---

SCHOOLS:		
Salaries and Fuel,	\$42,200	
Incidentals,	5,500	
Text Books and Supplies,	3,750	
Evening Schools,	1,000	
Industrial Schools,	200	
		\$52,650
Bonds and Notes Maturing,		14,000
Interest,		11,000

ART. 25. "To see if the town will appoint a committee to investigate and report as to whether a change in the present location of the Damon School is necessary, and if it is, to report as to the best location, and the approximate cost of making such change."

Messrs. Samuel T. Elliott, Alonzo W. Dunbar, Fred J. Hutchinson, Edward S. Hathaway, and Stillman E. Newell, were appointed a committee to consider this subject. ART. 26. "To see if the town will appoint a committee to act with the Selectmen in drafting a suitable bill to accompany a petition to the General Court for a new form of municipal government for large towns."

Messrs. Charles G. Chick, Wilbur H. Powers, Frank W. Darling, Edward S. Fellows, Frank B. Rich, and J. King Knight, were chosen as a committee under this article.

ART. 27. To see if the town will vote to purchase the franchise, corporate property, and all the rights and privileges of the Hyde Park Water Company, in accordance with the provisions of Chapter ninety-one (91) of the Acts of the year 1884 of this Commonwealth, and to take any action relating thereto.

Indefinitely postponed.

ART. 28. "To see if the town will vote to have all printed matter used by the town done by Union Labor, and have same bear the Allied Printing Trades Council Union Label."

Indefinitely postponed.

ART. 29. "To see if the town will authorize its Board of Selectmen to petition the General Court for necessary legislation, so that the town may consider the question of abolishing the Board of Sewer Commissioners."

Indefinitely postponed.

ART. 30. "To see if the town will authorize its Board of Selectmen to petition the Supreme Judicial Court, asking to have the rates fixed which the Hyde Park Water Company may charge the citizens of Hyde Park for water rates until the further order of said Court."

Indefinitely postponed.

ART. 31. To see what amount the town will authorize its Treasurer to borrow, in anticipation of the tax to be levied the current year.

Authorized to so borrow \$125,000.

Adjourned at 10.22 P. M.

NOVEMBER 3, 1903. The annual election of State, District and County officers was held in Waverly Hall. No other business was transacted.

The polls were opened at 6 o'clock A.M., and closed at sunset.

The number of votes received for the various candidates was as follows:

For Governor:	
John L. Bates, "Republican,"	1091
Thomas F. Brennan, "Socialist Labor,"	28

1997 ballots were cast at this election.

~

On December 9th, 1903, a town meeting was held in Waverly Hall, when the following articles were acted upon:

ART. 1. To choose a moderator to preside at said meeting.

Charles G. Chick, Esq., chosen by ballot.

ART. 2. To hear the report of the Selectmen laying out a part of Linwood Street as a public town way, and to see if the town will accept and allow said laying out with the boundaries and measurements of said way as shown by report, plan and profile now on file in the town clerk's office, and appropriate money to build the said street.

Report made and laying out accepted; \$400 appropriated therefor, the same to be taken from present "highway" appropriation.

ART. 3. To hear the report of the Selectmen laying a main drain, for the drainage of Readville Street and other streets, and to see if the town will accept and allow said laying, with the boundaries and measurements of the land taken for said main drain, as shown by report, plan and profile now on file in the town clerk's office, and appropriate money to lay said drain.

Report made and accepted; \$1,450 appropriated therefor, the same to be taken from present "highway" appropriation.

ART. 4. To see if the town will appropriate a sum of money not exceeding \$2,300, for the purpose of draining Washington Street, Loring Street, and Garfield Avenue.

\$2,300 appropriated for this purpose, the same to be taken from the present "highway" appropriation.

ART. 5. To see if the town will authorize its Selectmen to contract with the Hyde Park Electric Light Company, for the remainder of the term of our street lighting contract, for lights to be placed as follows: one incandescent light on Beaver Street, and one incandescent light on Metropolitan Avenue near the Boston line.

Selectmen were so authorized.

ART. 6. To see if the town will authorize its Selectmen, in behalf of this town, to make and execute an agreement with the town of Milton, to allow said town of Milton to use, in common with this town, so long as the drain shall be maintained by this town, on a strip of land ten feet wide and extending from a point near Beacon Street to land of the New England Railroad Company and adjoining or near the Hyde Park and Milton division line, such drains as may be constructed by this town on said land, said town of Milton to pay for such privilege a sum equal to one-half the expense incurred by this town in the purchase of said land, and the construction of a drain thereon, and also onehalf the expense to be incurred by this town in enlarging or repairing said drain; and "to convey by said agreement to the town of Milton equal rights, as nearly as possible, with Hyde Park in the future use and maintenance of said drain."

Selectmen were so authorized.

ART. 7. To see if the town will appoint a committee to consider the subject matter of a crossing for pedestrians, over the river and over or under the railroad, at or near Glenwood Avenue station, and report their conclusions to the town at a future meeting.

The moderator appointed Messrs. Lester P. Winchenbaugh, Edwin E. E. Bartlett, James R. Corthell, William D. Preston, and Henry M. Roberts, as a committee of five under this article.

ART. 8. To hear and act upon the report of any outstanding committee.

The committee on removal of Damon School-house made a report of progress. Report received and committee given further time.

Adjourned at 8 P. M.

# REPORT OF THE BOARD OF ENGINEERS OF THE FIRE DEPARTMENT.

TO THE HONORABLE BOARD OF SELECTMEN :

Gentlemen — The Board of Engineers herewith present their annual report for the year ending January 31, 1904.

The department has responded to one hundred and ten alarms during the past year, sixty-one bell and forty-nine still; there have been eighteen "no schools," and we have answered three Dedham, one Milton and one Boston alarm.

The department has travelled 750 miles, laid 17,200 feet of hose, 14,500 feet of chemical hose, raised 5,000 feet of ladders, used 5,500 gallons of chemicals, at forty-nine fires have used the chemical engine only:

	Value.	Loss.	Insurance.
Buildings,	\$368,100	\$23,100	\$240,500
Contents,	99,625	22,292	90,600
	\$467,725	\$45,392	\$331,100

We have extended the fire alarm, have replaced four miles of wire, have purchased five miles of covered wire and one thousand feet of hose, and have added five new fire-alarm boxes, having now everything in first-class shape.

The apparatus now consists of three hose wagons, one hose reel, one chemical engine, one ladder truck, two fivegallon hand chemical tanks, seven horses, five sets of double swinging harness, one single harness, six thousand feet of good hose, two thousand feet of poor hose, one Eastman deluge set, a storage battery, forty-three fire-alarm boxes, thirty miles of wire and ten single beds complete, all in good condition. The work of the department is increasing every year, more alarms having been answered than in any previous year, and great credit is due the men for their very efficient work.

The Board of Engineers wish to extend their thanks to the department for their faithfulness during the past year, and to the citizens for their words of encouragement.

The department now consists of Chief Engineer, two assistants, five permanent men, and thirty-four call men, making a total of forty-four members.

> JOHN H. WETHERBEE, Chief. JOHN C. McDOUGALD. DENNIS W. MAHONEY.

Windows found open and secured,	9
Lost articles found and restored to owners,	7
Lights hung on obstructions,	59

#### RECOMMENDATIONS.

I wish to recommend that some one be appointed to the office of Chief of Police who can devote his whole time to the business; also that the Town adopt the law in relation to placing the officers under civil service.

At the present time the police force consists of nine regular men and five Sunday men.

Requests have been made for an officer to be stationed at Readville, on the east side of the railroad tracks; also to divide that section, including Hazelwood and Clarendon Hills, which is now patroled by one officer. To do this it will be necessary to appoint two more men, and I would so recommend. The police station has been cleaned and painted throughout. The signal system has been installed and is in good working condition, and has proved a great benefit to the department. I recommend that the tramp room be abolished, and that four new cells be put into that room.

I wish to thank the officers for the excellent work they have done during the year, and hope they will receive the support of the citizens which they deserve.

Respectfully submitted,

WILLIAM WRAGG, Chief of Police.

# REPORT OF THE SUPERINTENDENT OF STREETS.

TO THE HONORABLE BOARD OF SELECTMEN:

GENTLEMEN: — I herewith submit to you my report as Superintendent of Streets for the year ending January 31, 1904.

- Streets Built 22,600 square yards with crushed stone; 18,100 square yards with gravel.
- Streets Resurfaced 5,950 square yards with crushed stone; 45,450 square yards with gravel.
- Sidewalks Constructed 5,830 square yards with gravel or cinders; 530 square yards with tar concrete; 285 square yards with granolithic.
- Sidewalks Resurfaced 4,800 square yards with gravel; 36,500 square yards with crushed stone dust; 6,360 square yards with tar concrete.
- Crosswalks 625 square yards with tar concrete; 130 square yards with granite flagging.

Gutters — 2,000 ft. have been constructed of tar concrete; 100 ft. paved with stone · 1,055 ft. repayed with stone.

Edgestone — 1,330 ft. have been set and 2,200 ft. reset.

- Drains and Basins 13 catch basins have been built, 1,350 ft, of drain pipe laid and 180 ft, relaid.
- Road Material used upon Streets and Sidewalks 7,300 tons of crushed stone, of which 3,720 tons came from the town plant and 3,580 tons from the Sallie's Rock Tunnel, 4,300 double loads and 998 single loads of gravel. 400 large loads of cinders.

- Gutterings From the gutters and catch basins there were removed 304 double loads and 3,560 single loads of waste material.
- Bridges \$600 have been expended in repairs.

Fences — 1,600 ft. were built at a cost of \$225.

General Repairs - \$5,060.

Removal of Snow and Ice - \$2,505 65.

Steam Roller — In use 26 weeks, and cost for supplies, labor and repairs \$1,176.

Stone Crushing — Supplies, labor and repairs cost \$3,237.30. Maintenance of Tools and Wagons — \$1,082.75.

Repairs on Watering Carts and Cranes - \$602.30.

Added to Plant — Five snow ploughs at a cost of \$260 85. Street sweeper at a cost of \$250.

## DETAILED STATEMENT.

Austin St. - Resurfacing si lewalk \$40.

- Beaver St. Building sidewalks \$120.
- Business St. Resurfacing sidewalk \$165, Building and repairing catch basins \$105.
- Central Ave. Resurfacing street \$875. Resurfacing sidewalks and crosswalks \$175.
- Childs St. Resurfacing sidewalks \$70.

Cleveland St. - Resurfacing sidewalk \$60.

Dana Ave. - Rebuilding street \$2,300.

- E. River St. Resurtacing sidewalks \$730. Resetting curbs \$120. Building catch basin \$35. Granite cross-walk \$65.
- *Everett St.* Granolithic sidewalks \$436,05. Resurfacing sidewalk \$35. Curb stones \$180. Rebuilding street \$350.

Fairmount Ave.—Resurfacing sidewalks and crossings \$225. Curbstones \$15. Repairs to bridge \$150.

Franklin St. - Resurfacing street \$60.

Franklin Terrace - Resurfacing street \$75.

Green St. - Resurfacing street \$55.

Greenwood Ave. - Resurfacing sidewalks \$40.

Harvard Ave. — Rebuilding' street \$1,550. Catch Basins \$165. Sidewalks \$125. Curbstone and paving \$235.

Highland St. - Repairs to street \$110.

- Huntington Ave. Building and resurfacing sidewalk \$90.
- Hyde Park Ave. Resurfacing sidewalks \$350. Gutters and curbstone \$196. Resurfacing street \$80.
- Maple St. Resurfacing street \$425. Building catch basins \$100.
- Metropolitan Ave. Resurfacing street \$420. Resurfacing sidewalks \$170.

Milton St. - Resurfacing street \$560.

Milton Ave. — Resurfacing street \$205. Resurfacing sidewalks \$15,

Mt. I leasant St. - Rebuilding sidewalk \$65.

- Oak St. Resurfacing street \$90. Curbstone \$90. Sidewalk \$35.
- Perkins Ave. Curbstone \$200. Catch basins and gutters \$110.
- Pierce St. Rebuilding street \$650. Catch basins and curbstones \$150.

Riverside Sq. - Resurfacing street \$70.

Water St. - Resurfacing sidewalk \$160.

Walter St. - Draining and resurfacing street \$130.

Warren Ave. - Resurfacing street \$190.

West St. — Rebuilding \$1,000. Resurfacing sidewalks \$85. Gutters and catch basins \$365. Curbstone \$35.

- W. River St. Resurfacing street \$1,320. Rebuilding street \$630, Curbstone \$260. Sidewalks \$400.
- Williams Ave. Resurfacing street \$300. Resurfacing sidewalks \$100.

CLARENCE G. NORRIS,

Superintendent of Streets.

## REPORT OF CEMETERY COMMISSIONERS.

In the warrant for a town meeting held on the twentyfifth day of March, 1891, there was an article authorizing the taking of action to provide for a suitable place of burial for "persons dying within the limits of this town." Under this article the town appointed a Committee. At a meeting held December 30, 1891, this Committee reported, and an appropriation of \$10,000 was made for the purpose of establishing a Cemetery, and the Committee was authorized to continue in the performance of its duties.

February 17, 1892, the selectmen were authorized to buy the whole or any part of the Gilman Farm for cemetery purposes, and to make application to the proper authorities for the condemnation of the whole or part of said land Proper proceedings were instituted, and the town became the owner of a large part of the land now held by it as a cemetery, at a cost of \$7,457. In addition to the expenditure for the land, the Committee spent for expenses of survey, legal services, printing and advertising, \$836.98. The name, Fairview Cemetery, was given by this Committee.

September 7, 1892, Cemetery Commissioners were appointed by the selectmen, and thereupon entered upon their duties. Work upon the cemetery was at once commenced, and the Commissioners expended during the remainder of the year \$1,582.42, leaving a balance unexpended of the original appropriation of \$123.60.

For the same period the Commissioners received from the sale of lots, etc., \$1,706.

The first interment was made November 9, 1892.

Under vote of the town in early years, all moneys received from the sale of lots were turned over to the town treasurer, to be used in payment of the debt incurred at the outset. In 1893, an additional appropriation of \$4,500 was made, the larger part of which was used in the construction of a receiving tomb. The tomb was ready for use early in 1894.

In March, 1894, the town instructed the Commissioners to set apart a portion of the cemetery for the burial of persons of the Roman Catholic faith, and also authorized the Commissioners to use money received by them for the purchase of land for the use of the cemetery, and to meet the expenses necessary for the purpose of constructing avenues and paths and preparing the land. In order to carry the first vote into effect, an appropriation of \$6,000 was made.

In 1895, an additional appropriation of \$2,000 was made, and in 1896 and 1897, \$500 was appropriated in each year, Since 1897, no appropriation has been made by the town.

The entire amount appropriated by the town has been \$23,500.

Since 1893, the Commissioners have purchased additional lands as the same came from time to time into the market. paying therefor \$2,820.84, from the funds in the possession of the town. The receipts also reimbursed the town in payment for the land originally purchased to the amount of \$8,000, so that the net cost of the cemetery to the town to date, apart from interest charges, amounts to \$15,500.

As will be seen later in this report, the Commissioners now have on hand a fund of \$10,633.06, an increase of \$1,161.20 from last year.

This fund, as will be seen by reference to previous reports, is increasing rapidly, but considerable of it will be required within a few years for the purchase of additional land in order to round out the holdings of the town, and the completion of the main avenue, Fairview Drive. In years to come, when the older part of the cemetery will be less used, the money received from sales of lots will be required in adapting for use other parts of the cemetery. The annual receipts will probably not be sufficient to pay the running expenses of the cemetery, and the interest on the fund may be required for that purpose.

During the past year the retaining wall on Fairview Drive has been extended, the area prepared for single graves has been increased, and otherwise the work done has been in the care of lots already sold and the gradual extension of the area ready for use.

The receipts and expenditures for the financial year ending January 31, 1904, are as follows :

RECEIPTS.		
From sale of lots,	\$1,620 00	
From sale of single graves,	280 00	
Interment and receiving tomb charges,	623 00	
For foundations and labor,	151 55	
For wood, stone and grass,	127 25	
For interest on fund,	378 83	
Total,	\$3,180 63	
Balance on hand January 31, 1903,	9,471 86	
		\$12,652 49
EXPENSES.		
Labor, etc.,	\$2,019 43	
Balance on hand January 31, 1904,	10,633 06	
		\$12,652 49

Details of expenses are given elsewhere in the Town Report.

STATISTICS.	
1903.	
Lots sold,	21
Single graves sold,	26
Interments in lots,	36
Interments in single graves,	77
In receiving tomb,	30
Removals,	5

JOHN O'CONNELL, CHARLES F. JENNEY, Commissioners.

## REPORT OF THE PARK COMMISSIONERS.

We herewith submit the report of the board as follows :

The property under our care is the same as in last report, namely, Camp Meigs Memorial Park in Readville.

At the request of a special committee from the Readville Improvement Association, a hearing was given them on the condition of the Park and the following vote was passed; "That the sum of sixty dollars be appropriated for the purchase and planting of shrubbery in Hamilton Park on condition that the Readville Association assume the care and maintenance of the shrubbery and that the same be placed under the supervision of the Association so that the work would be done to the satisfaction of this board."

The above vote was carried out faithfully, greatly improving the appearance of the Park.

A petition was received from the Camp Meigs Memorial Association asking that the name of Hamilton Park be changed to "The Camp Meigs Memorial Park." We voted "That so far as this board has the authority, the name is approved and adopted."

On July 4th, public exercises were held to dedicate this Park under the above name. Mr. Augustus S. Lovell of Brookline delivered the historical address. During the year the board concurred with the Metropolitan Park Commission in the abandonment of three small parcels of land, namely, as shown on plan No. 430 at Wilton Street, plan No. 435 near Fairmount Avenue, and plan No. 346 near Station Street.

> JOHN J. ENNEKING, Chairman, FRANK B. RICH, Secretary, LAWSON B. BIDWELL,

Park Commissioners.

# REPORT OF INSPECTOR OF BUILDINGS.

TO THE HONORABLE BOARD OF SELECTMEN : Gentlemen - Following is the report of the Inspector of Buildings from May 1, 1903, to January 30, 1904. Whole number of permits granted,  $\mathbf{28}$ For new buildings, 20For additions and alterations, 8 Number of notices issued to those not complying with the law,  $\mathbf{2}$ Number of visits made to the various buildings in process of erection and alteration, work shops, back yards, dance halls, billiard rooms, bowling alleys, and stables, 193

I have submitted my annual report to Rufus R. Wade, Chief of District Police, State House, Boston, Mass.

Respectfully submitted,

RICHARD F. BOYNTON,

Inspector of Buildings.

۰.,

## REPORT OF TREE WARDEN.

TO THE HONORABLE BOARD OF SELECTMEN :

Gentlemen — I herewith submit the report of the Tree Warden for the year ending January 31, 1904.

On application, public hearings were held for the removal of trees on Neponset Avenue, West Street, Hyde Park Avenue, East River Street and Metropolitan Avenue.

At the hearings no opposition appeared, and permission was given to remove two on Neponset Avenue, two on Metropolitan Avenue and one on Hyde Park Avenue.

Trees have been trimmed where complaints have been made of low hanging limbs, but a thorough trimming over the whole town should be done; but as there is no appropriation made for this work, I did not feel like going to any great expense.

Respectfully submitted,

EDWARD J. CHANDLER,

Tree Warden.

# TOWN CLERK'S REPORT.

Number of births registered in Hyde Park in 1903	392
Males	197
Females	195
The parentage of the children is as follows :	200

CHARLES LEWIS, GEORGE W. CHAPMAN, GEORGE E. HAVEN,

١,

Overseers of the Poor.

### REPORT OF THE BOARD OF HEALTH.

TO THE CITIZENS OF HYDE PARK:

We have the honor to present to you the following report of the work of this Board, for the year ending January 31, 1904.

#### CONTAGIOUS DISEASES.

There have been reported to the Board during the year ending December 31, 1903, 132 cases of contagious diseases, divided by months as follows.

	Diphtheria.	Scarlet Fever.	Measles.	Typhoid Fever.
January,	3	I	0	2
February,	2	43	О	0
March,	I	25	О	0
April,	О	9	О	0
May,	I	8	I	I
June,	4	I	I	3
July,	2	2	О	0
August,	I	4	О	2
September,	О	I	О	3
October,	О	О	0	4
November,	0	3	0	0
December,	О	3	I	0
				· - ·
	14	100	3	15

No deaths from diphtheria or from measles, 5 from scarlet fever and 2 from typhoid fever.

During the month of February the town was threatened with a very serious epidemic of scarlet fever. On February 11th, one case was reported; on February 12th, 4 cases; February 13th, 5 cases; February 14th, 11 cases. These cases were not confined to any particular part of the town, but were scattered throughout all sections. On February 14th investigation was made as to the probable source of infection, and it soon developed that the infection came from a common source, namely, the milk supply. This milk supply was investigated on the same day, and it was found that at one of the dairies from the which milk was brought to the town, there existed one or more cases of scarlet fever This dairy was located in an adjoining town. The dealer was required to destroy all milk in his possession, thoroughly sterilize all cans, and such utensils, etc., as were used in handling the milk, and the milk from said dairy he was forbidden to bring into the town. Time proved that this means of stopping the infection was effectual, as new cases did not appear after the time of incubation had passed, to any great extent.

It is but fair to say of the milk dealer that it appears that he was unaware of the presence of the disease at this place, and that he assisted in every possible way to discover the source of the contagion and to prevent its recurrence.

During the latter part of June, the Board was notified of what appeared to be a case of small-pox, and located in the Fairmount House. Owing to the location it was absolutely necessary to provide some place where the case could be taken care of until it should develop. To comply with this necessity there was established a temporary hospital consisting of a platform, over which was erected a tent. Later on, the disease proved to be other than small-pox, but we were obliged to maintain the patient until recovery.

The Grew, Fairmount, Damon, Greenwood and High Schools were also thoroughly fumigated at this time by the School Committee co-operating with the Board of Health, and we wish at this time to thank them for their assistance.

There have been but fourteen cases of diphtheria during the past year, with no deaths. Anti-toxine has been furnished free of charge to all who require it, and is no doubt responsible to a great degree in bringing about the above result, and we trust that no act of the Legislature will prevent the State Board of Health from the production of this protection from a disease which at times has been a scourge to the community.

The Board would request that in all cases of consumption where death takes place, or where the person afflicted with consumption is removed from one house to another, that the Board be notified of the same, and that they be allowed to disinfect the premises, because we feel that in so doing it will be a step towards holding the disease in check. The Board would advise that in all cases of contagious diseases that the patient be isolated as completely as possible, and that every affort be made to prevent contagion. The Board is connected with the Mass. Association of Boards of Health, which is of great advantage in that we are able to compare notes and acquire information concerning all matters pertaining to the duties of a Board of Health,

#### COMPLAINTS.

Again the Board would request that all complaints made to us be made in writing and signed, as these communications are confidential and the names of the complainants will not be divulged. We would also request that knowledge of any matter which would require the attention of the Board be immediately communicated to us so that it may be attended to, remedied or prevented before any evil results occur.

#### SANITARIES,

The need of a central station in or near the centre of the town for the use of the public in general is becoming more and more apparent, and we trust that the time is not far distant when this very necessary accommodation may be furnished for the use of the people.

#### SURFACE DRAINS,

For several years the policy of the Board has been to eliminate as far as possible all places where stagnant water lies, and the Readville and Garfield Avenue districts have needed attention in regard to surface drains for many years. This matter has been referred to and recommended in previous reports, and we are pleased to be able to say at the present time that steps have been taken and work begun which will furnish the means for the effectual abatement of these nuisances. This will render the adjoining territory more habitable and furnish the town with more available building surface.

#### SEWERAGE.

The number of connections with the public sewer is about the same as in former years, but a small proportion only of houses to which the sewer is available are at present connected. The Board would strongly recommend that the advantages of connection with the sewer be availed of as rapidly as possible; also that sewers should be provided in Reddy Avenue and Rosa Street, Holmfield and Readville districts, where in the former place the ground is not suitable for the maintenance of proper cesspools, many of those now in use being constant sources of complaint, and in the latter where the unoccupied territory will in all probability be rapidly built upon, the sewers should be provided, so that connection with them could be made when the buildings are erected, thus saving expense in the future.

### COLLECTION OF ASHES AND RUBBISH.

The collection of ashes and rubbish has been continued in the same manner as last year, and the number of loads collected during the year amounts to 3,704, divided by months as follows:

	1903-04.	1902-03.		1903–04.	1902-03.
February,	287	268	August,	199	206
March,	414	406	September,	263	192
April,	375	399	October,	190	213
May,	303	337	November,	330	249
June,	337	259	December,	393	296
July,	287	271	January,	326	357

#### THE COLLECTION OF SWILL.

The collection of swill has been carried on this year the same as last, partly by contract and partly by the town teams. The work of collecting swill and ashes is not, strictly speaking, one of the duties of the Board of Health, and we would recommend that this work be done by the Street Department or by some Board having under control the public work in the town.

#### NEW REGULATIONS.

We would call your attention to new regulations adopted by the Board from time to time during the year, which appear herewith.

# REGULATIONS OF THE BOARD OF HEALTH OF THE TOWN OF HYDE PARK.

PUBLIC STATUTES : CHAPTER 80, SECTION 18. — The Board of Health of a town shall make such regulations as it judges necessary for the public health and safety respecting nuisances, sources of filth, and causes of sickness within its town. Whoever violates any such regulation shall forfeit a sum not exceeding one hundred dollars.

In accordance with the foregoing provisions of law, this Board makes the following regulations, which will be strictly enforced :

REGULATION I. *Privy Vaults and Drains*. Section I. Every tenement shall be provided with a water-tight underground drain to carry off the waste waters, also with a suitable privy or water-closet sufficient for the accommodation of all those inhabiting the premises.

Section II. All privy vaults, unless water-tight, shall be so constructed that the inside of the same shall be at least five feet distant from the line of any adjoining lot or street, and at least twenty feet from any dwelling house, and shall be provided with a ventilation through the roof. The same shall not be used as cesspools nor receive drainage from the premises. The contents shall not be allowed fo leak out or otherwise become offensive. All privy vaults shall be of a size sufficient to satisfy the Board of Health.

Section III. All waste water shall be conveyed through sufficient drains under ground to a cesspool sunk underground, which shall be of sufficient size to contain at least 80 cubic feet, and when not water-tight must be at least twenty feet from the cellar wall of any tenement or dwelling, and at least five feet distance from any adjoining lot or street. Cesspools shall be built in a thorough and substantial manner, as shall be approved by the Board of Health. Section IV. No person shall allow any drain or the overflow of any cesspool to enter any running stream, or any drain coustructed for surface water, and no person shall suffer any house drainage or other offensive matter to remain in any cellar, or upon any lot or vacaut ground by such person owned or occupied. All privy vaults or cesspools within one hundred and fifty feet of any well or spring, the water of which is used for domestic purposes, must be water-tight.

Section V. All privy vaults or cesspools must be thoroughtly cleansed at least once in each year, and oftener if necessary for the public health, the expense to be borne by the owner of the property.

REGULATION 2 Section I. The Board, when satisfied upon due examination that a cellar, room, tenement or building in the town occupied as a dwelling place, has become by reason of the number of occupants, want of cleanliness, or other cause unfit for such purpose, and a cause of nuisance or sickness to the occupants or to the public, may issue a notice in writing to such occupants, requiring the premises to be put in proper condition; or if the Board see fit they may require the same to be vacated, and the same shall not be again occupied without the written permission of the Board.

Section II. No person shall throw or put into any public place or pond, or running stream or body of water, or in any other place where the Board of Health may deem it a nuisance, any dead animal, animal matter, decayed fruit or vegetables, dirt or rubbish whatever; nor shall any person throw into or upon any flats within the jurisdiction of the town, any dead animals, filth, or offensive matter.

**REGULATION 3.** Swill and Offal. Section I. No person shall remove or carry in or through any of the streets, lanes or avenues. places or alleys within the town of Hyde Park, the contents of any cesspool, vault, or privy well, swill or house offal (either animal or vegetable), or grease or bones, unless a permit be granted by the Board of Health upon such terms and conditions as said Board may deem necessary.

Section II. No person shall bury swill or house offal, or the contents of any cesspool, vault, privy or privy well within the limits of the town of Hyde Park, unless a permit be granted by the Board of Health.

Section III. Parties will be licensed by the Board of Health to collect swill and refuse matter from houses in Hyde Park twice a week or oftener, and all housekeepers and others are directed to deliver the same to those duly authorized to make such collections.

**REGULATION** 4. Diseased Meat and Provisions. Section I. No person shall bring into the town, keep or offer for sale any diseased, putrid, stale or unwholesome meat, vegetables or provisions.

**REGULATION 5.** Swine. Section I. No person will be permitted to keep any swine within the limits of the town of Hyde Park, without a written permit from the Board of Health.

REGULATION 6 Contagious Diseases. Section I. Any person sick with the smallpox or other contagious disease, together with all persons in attendance upon them, and the premises where such sick person is, will be subject to the control of the Board, and no person shall enter or leave a house wherein a person is or has been sick with the disease, or in any way come in contact with the inmates of such house except by permission of the Board.

Section II. Whenever the Board of Health shall ascertain that any person is sick with the smallpox. scarlet fever, diphtheria, or any other disease dangerous to the public health, the Board shall, at their discretion, have full control of said person or premises, and shall, if they deem proper, order the premises vacated.

Section III. All persons are warned not to approach a house or the surrounding premises whereupon is displayed a disease flag by day or a  $\mathbf{r}$  dight by night.

Section IV. The bodies of all persons dying of smallpox, scarlet fever, typhus fever or diphtheria, must be immediately disinfected and placed in a tight coffin, which shall not be reopened, and the bed, bed clothing, and other clothing used by any such person, and by those in attendance upon him, and all the furnishings of the sick room, thoroughly disinfected before being taken from the room. In the above case no public funeral will be allowed without permission from the Board of Health.

Section V. The owner or person having charge of any vehicle, public or private, used at a funeral in the forgoing cases, to carry the deceased, shall forthwith report the fact to the Board of Health, and shall thoroughly disinfect such vehicle before the same is again used, and take such precaution as the Board of Health shall direct

Section VI. Any person in the Town of Hyde Park, who knows or suspects any domestic animal has contagious disease (such as glanders in horses or cholera in swine), must immediately report the same to the Board of Health. The penalty for neglect to do so is fine or imprisonment. The above is in accordance with the provisions of Chapter 252 of the Acts of 1887.

REGULATION 7. Section 1. All complaints in relation to nuisances and sources of filth injurious to the public health and safety, must be made in writing to the Board of Health, with a description of said nuisance and of the premises on which it exists, with the owner's name if known to the complainant. Such complaint must bear the signature of the complainant. Whenever such complaint shall be made as aforesaid, the Board of Health shall proceed to examine the premises complained of, and will take measures to abate the nuisance if such is found to exist.

**REGULATION 8.** Section J. No person, firm or corporation not now engaged in or working at the business of plumbing shall hereafter engage

in or work at said business in the town of Hyde Park, either as a master or employing plumber or as a journeyman plumber, unless such person, firm or corporation first receives a license therefor, in accordance with the provisions of Chapter 477 of the Acts of the year 1893 of the Commonwealth of Massachusetts, and Acts amendatory thereof or supplementary thereto.

Section II. Any person desiring to engage in or work at the business of plumbing, either as a master or employing plumber, or as a journeyman plumber, shall apply to the Board of Health, and shall at such time and place as may be designated by the Board of Examiners appointed by the Board of Health, as provided for in said Acts, to whom such application shall be referred, be examined as to his qualification for such business. In the case of a firm or corporation, the examination and licensing of any one member of the firm, or the manager of the corporation, shall satify the requirements of the regulation.

Section III. The Board of Examiners shall examine said applicants as to their practical knowledge of plumbing, house drainage and plumbing ventilation, and if satisfied of the competency of the applicant, shall so certify to the Board of Health. Said Board will thereupon issue a license to such applicant, authorizing him to engage in or work at the business of plumbing. The fees for a license for a master or employing plumber shall be two\_dollars; for a journeyman plumber it shall be fifty cents. Said license shall be issued annually, expiring on the thirty-first day of May next ensuing, and shall be conditional on skillful work and a strict observance of the rules governing plumbing.

Section IV. No person shall carry on the business of plumbing unless he shall have first registered his name and place of business in the office of the Board of Health : and notice of any change in the place of business of a registered plumber shall be immediately given to said Board.

Section V. No person shall proceed to construct, add to or alter any portion of the drainage system (except to repair leaks) of any building in the town of Hyde Park, until plans showing in detail the whole drainage system shall have been filed at the office of the Board of Health, upon blanks in such form as the Board may determine; no person shall commence work on such drainage system until the plans are accepted by the Inspector of Plumbing and a permit of approval granted. Plans and specifications shall be approved or rejected within five days of the time of filing.

Rules and regulations for material, construction, etc., may be found in the town by-laws.

REGULATION 9. The Board of Health hereby adjudges that the deposit of sputum in 'street cars, public buildings or churches is a public nuisance, source of filth and cause of sickness, and hereby orders : That spitting upon any floor of any street car, public building or church be, and hereby is prohibited. REGULATION IO. No privy, vault or cesspool shall be established either upon premises situated upon a public or private street, court or passageway where there is a public sewer opposite thereto or upon premises connected with a public or private sewer, without permission in writing first being obtained from the Board of Health of this<sup>a</sup> town. And whenever there is a privy vault or cesspool so<sup>\*</sup>situated, which in the opinion of the Board of Health of this town is injurious to the public health, said Board of Health shall declare same to be a nuisance and forbid its continuance.

REGULATION 11. After the first clearing up of ashes, beginning May I, all rubbish, ashes, etc., to be removed by town carts are to be placed in receptacles not larger than an ordinary flour barrel, and in places easily accessible to the collector. Vault filth, offal, bricks and mortar, gravel and garden shrubbery are not included in the above, and will not be removed by the town.

REGULATION 12. All persons (who under Chap. 75, Art. 49 and 50 of the Revised Laws are required to report cases of contagious disease) shall report each case of chicken-pox.

REGULATION 13. No person or persons shall remove from the premises where a case or cases of contagious disease exists, any milk vessel or container used in the sale or delivery of milk, when he or they know, or the Board of Health through their agent, shall give due notice, by posting the same on the premises, that such disease exists.

The foregoing rules and regulations were made under the Revised Statutes and are similar to those of other towns in the state; and a careful observance of the same will do much to prevent contagious disease within the town.

REGULATION 14. Hyde Park, April 6, 1903, the following regulation was adopted :

No person can act as undertaker within the limits of Hyde Park who has not been licensed to perform that duty by the proper authority of some city or town in this commonwealth.

Public Statutes, Chapter 437, Acts of 1897.

No disinterments or removals of dead bodies shall be allowed between May 15th and October 15th, except by special permit of the Board of Health, and under its direction.

No person shall bury or inter, or cause to be buried or interred, the body or ashes of any dead person, at any other time of the day than between sunrise and sunset, except in accordance with a permit from the Board of Health.

No person shall remove or canse to be removed the body of any dead person from its casket or coffin, for any purpose whatever, at any cemetery or burial ground within the limits of Hyde Park.

No dead body shall be buried within three feet from the top of the box and the surface of the ground surrounding the grave.

#### Hyde Park, Nov. 16, 1903.

REGULATION 15. At a meeting of the Board of Health this day, the following regulation respecting barber-shops was adopted :

The place of business, together with all the furniture, shall be kept at all times in a cleanly condition.

Mugs, shaving brushes and razors shall be sterilized by immersion in boiling water, after every separate use thereof.

A separate clean towel shall be used for each person.

Alum, or other material used to stop the flow of blood, shall be so used only in powdered form, and applied on a towel.

The use of powder puffs is prohibited.

The use of sponges is prohibited.

Every barber-shop shall be provided with running hot and cold water. No person shall be allowed to use any barber-shop as a dormitory.

Every barber shall cleanse his hands thouroughly immediately after serving each customer.

Hyde Park, Jan. 4, 1904.

REGULATION 16. At a meeting of the Board of Health this day, the following regulation was adopted :

All children afflicted with either mumps, small-pox, or whoopingcough, shall be excluded from school during time of illness.

> CHAS. F. STACK, M.D., Chairman. WILLIAM W. SCOTT.

### REPORT OF INSPECTOR OF PLUMBING.

### To Dr. C. F. Stack, Chairman, and Members of the Board of Health, Town of Hyde Park.

GENTLEMEN — I have the honor to submit to you my seventh annual report for the year ending January 31, 1904.

There have been filed at this office 150 applications to do plumbing, with plans and specifications calling for the following fixtures: water closets 210, wash bowls 75, bath tubs 55, wash trays 38, sinks 123, urinals 40. Traps to replace defective and inefficient ones 63. Total number of applications for sewer connections, 98.

Although the total number of applications to do plumbing in the town was somewhat less than last year, doubtless owing to the inactivity in building lines, the number of fixtures installed was greater. This department also prepared specifications for plumbing in the Fairmount School, which were executed during the summer vacation, under the supervision of the Inspector.

I wish at this time to thank the plumbers of the town for their courtesy and efforts to bring sanitary plumbing nearer to the desired standard.

Respectfully submitted,

CALEB T. LOVELL, Inspector of Plumbing,

CHARLES F. MORRISON, GEORGE W. CHAPMAN, FRANK GREENWOOD,

Assessors.

## REPORT OF SUB-COMMITTEE ON VALUA-TIONS AND ASSESSMENTS.

TO THE MEMBERS OF THE ADVISORY COMMITTEE.

Gentlemen : The sub-committee appointed at your last meeting to consider the subjects of Valuations and Tax Assessments have attended to the duties assigned them as far as the time at their disposal has allowed, and respectfully submit the following report.

In our interpretation of the scope of the duties assigned us we have not felt called upon to pass upon the personnel of the Board of Assessors, either as regards ability or fitness, but rather to consider the broader questions of values, methods of administration, principles of assessment, and whether any partiality or favoritism is shown in the assessment.

In our consideration of the questions of Values and Assessments we have divided the real estate in town into four classes, viz :---

- 4. Outlying Lands.
- 3. Business Property in the centre of the Town.
- 2. Manufacturing Plants.
- I. Residential Property.

In regard to the first of these, the residential property, we believe, as the result of such investigation as our time has allowed, that the present assessed values are, as a whole, reasonably fair and equitable. It would be strange if there were not some inequalities; but we have taken the estates on one side of certain streets where the valuation had been criticised, and have found that while the values of different estates varied, there appeared to be a good reason in each case for such difference.

Your Committee is also convinced that the residential property as a whole is already taxed to its fair market value, and cannot be further advanced without placing upon it a fictitious figure. Excessive valuation is not the policy of neighboring towns. nor has it been the policy of Hyde Park in recent years, and we are of the opinion that the real estate interest would suffer if there were any general increase in the value of residential property. That there are however, individual cases that are exceptions to this rule we have no doubt. If we rightly understand the situation, it is some years since a detailed valuation resulting from a close inspection of the individual properties was made, and it is our opinion that such an inspection and re-valuation would result in an increase of the volume of taxable property of this class. Several instances have been brought to our notice where additions and improvements involving expenditures of from \$1,000 to \$2,000 have been made in a single year, but no increase in taxes has followed. We believe a closer survey of this class of property year by year, with perhaps an entire re-valuation once in a given term of years, would undoubtedly adjust any inequalities which may exist, and also increase the aggregate taxable value of this class of property.

2. Manufacturing Plants. The advantages which Hyde Park offers as a manufacturing centre are more and more apparent. Towns at a remote distance from Boston feel obliged to rebate taxes on new enterprises in order to induce them to locate within their limits. Our natural advantages are such that no such inducement has ever been necessary, and it is the policy of the town to assess all such plants at a fair value. The value of such property is more difficult to ascertain than is that of residential property, and we consider the present methods entirely inadequate to determine just what may be the fair taxable value of any given piece of property of this class. The Assessors have not that definite information as to the cost of buildings, machinery, and the

value of stocks on hand, which will enable them to determine with confidence the actual value of the plant, and hence are placed at a great disadvantage in fixing the valuation. They are in no position to defend their figures from the charge of over-valuation from the agents of such plants, nor from that of under-valuation brought by some citizens of the town. The fear of expensive litigation is created by the lack of exact knowledge as to the real value of the plant, and this fear must operate to keep the assessment below what the property ought to bear. Nor do the returns of corporations filed at the State House furnish a reliable basis of values for taxable purposes. It must be borne in mind that values given in such returns cover many things which cannot be considered in fixing taxable values. Take a consolidation of two separate manufacturing interests, such as is represented by a manufacturing corporation in this town, as an illustration of this point. Bonuses paid for acquiring an established business and name, franchises, royalties, patent rights, etc., which represent large values for business purposes, and for which large sums have been paid, but which have no value whatever except in that connection, must necessarily be included in balancing the books and in making the business statements of such corporation, but furnish absolutely no basis for taxation.

It is important, however, that the Assessors should know with a fair degree of accuracy the value of such plants, that they may not be excessively taxed on the one hand, nor through their failure to pay on an equitable basis force an inequitable tax upon all other property in town. To accomplish this end, it seems to us that in the appraisal of such property the Assessors would do well to avail themselves of the services of expert appraisers, men thoroughly familiar with factory and mill construction and machinery and stock values in the several manufacturing lines represented, and we recommend the adoption of this plan in future assessments, the expense of such expert services to be paid from the Incidental Fund of the Board of Selectmen. It is as important that the town secure expert knowledge in the valuation of these large manufacturing plants as it is to seek legal advice in determining questions of law.

As an illustration of the need of fixing some such basis . f valuation, a single instance which has been reported to your committee will suffice. A certain concern reported the value of partial construction as \$50,000. The Assessors deemed this figure inadequate, and raised it to \$150,000, and on this amount the tax was paid without a word of dissent; a clear indication that the property in question was really worth that much, and it is fair to infer that even that figure was less than the real value. On the basis of the 1903 tax rate, such an increase in valuation would mean an increase of \$2,040 in taxes paid in that single case. What would it mean if proper values could be placed upon all such property in town? So much new property of this class is being created that the importance of placing a proper valuation at the start, as affecting all future assessments, must appear to all. We are of the opinion that an application of the plan recommended to the 1904 assessment would add at least \$500,000 or even \$600,000 to the taxable property in this class. There is no doubt in the minds of this committee that certain properties of this description are not assessed up to the values they would bear if the plan suggested should be adopted.

3. Business Property. Perhaps this class of property may be considered the hardest of all upon which to place proper values. As idle land it may be one thing; as improved property it may be quite another. The value of a piece of land on our main street is largely dependent upon its ability to produce an income. The inability to get at adequate figures in this direction makes the tax value a hard problem to solve; and these values are not fixed values, but change with changing conditions of development. A glance at Fairmount Avenue will illustrate this principle. The development of the past few years has tended to lessen the value of store property from Everett Square to the New England R.R. crossing, while from the Square to the Providence R.R. bridge values for business purposes have largely increased, as is evidenced by the long line of vacant stores on the former section as against the fully occupied store property on the other. Under these conditions it would not be strange if inequalities existed in the assessements. Under such conditions taxable values become largely a matter of judgment. Assessors are not infallible; any three men, even experts, would be liable to err in judgment. Doubtless inequalities do exist, but from such a close examination as we have been able to give to reports that have come to us along this line, we declare it our opinion that if so, they are matters of judgment, and in no way the result of favoritism or partiality. If certain pieces of property are assessed too little, it is equally possible that others are assessed too much. An entire re-valualtion of the business property located on the main street between the two rail ads would probably remedy existing inequalities, and result in an increase of the aggregate tax values of this class of property.

In this connection we have thought best to compare the assessments on property located on West River Street between the Square and the Providence R.R. for the year 1903 with those of 1897 on the same property, taking the land values only, to see whether the increase has been proportional with the development of the town in that period. For the purposes of such comparison, twelve estates have been considered, including the corners of all the main avenues and one or two adjacent properties. These twelve estates, embracing 133,463 square feet, were assessed in 1897 on a valuation of \$108,150; in 1903 the valuation had increased to \$169,350, an advance of \$61,200, or 56.58 per cent. On the several pieces the increase ranges from 6 per cent to 320 per cent.

4. Outlying Lands. Our attention has not been turned to any great extent to this class of taxable property, and we are not familiar with the plans of the Assessors in treating such lands. In view of the improvements which have been made in the railroad and manufacturing section in Readville, the Metropolitan Park improvements in the western section of the town, and the fact reported to us that prices will not be given on some of this property by the owners, but that it is being held in anticipation of enhanced values in the future, we suggest that particular attention be given to property of this class by the Assessors with a view of increasing the values where in their judgment such action shall be warranted.

To summarize the results of our deliberations we would say, that whatever inequalities may exist in valuations and assessments, we find them largely chargeable to the system of assessment which has descended to the present Board through a long line of predecessors, rather than to any particular shortcomings of the present Board over and above any that have preceded them. The business has been carried on along certain lines because it has always been done so, and no Board has seen fit to step outside those lines.

With the broad question of the relative merits of a moderate valuation with a high tax rate, or a higher valuation with a lower rate, we do not consider that we are called upon to express an opinion or enter into a discussion. Taking things as they are, we find: That so far as residential property is concerned, the values are, as a whole, fair in a majority of cases. That there are inequalities of assessment there is no doubt; and we are also of the opinion that a more careful and systematic canvass and inspection of this class of property would result in some increase of the total valuation.

On manufacturing property, we are of the opinion that the assessed values are lower than they should be, and that a careful and intelligent revision under expert assistance should be made. We believe that such a course would largely increase the volume of taxes received from this class of property and remove many of the difficulties which now confront the Assessors.

As regards business property, we find that the increase in the Assessors' valuation has apparently kept pace with the development of the town. Whether the values now attaching to such properties are adequate in every case may be a matter of opinion, as to settle that point intelligently would require a careful consideration of all the surrounding circumstances in each individual case. It is highly probable that such an investigation would reveal instances of under-valuation, and perhaps cases of overtaxation as well. To obviate the difficulties apparently existing, we feel that a careful re-valuation of the entire town should be made, and that in addition to the usual annual changes which are made a new valuation should be made (or at least an entire revision of recorded values) as often as once in five years, and that the town should make such a plan a part of its established policy. We recognize the fact that such a system would largely increase the work of the Assessors and call for a larger pay for that service, but we feel that the results attained would many times compensate for the increased cost of the department. Indeed. we question whether even under the present system the pay of the department is commensurate with the service required. We have found it to be less than neighboring towns having a smaller valuation.

In the matter of outlying lands the suggestion made in the report comprehends all we have to say on that point.

In the matter of favoritism or partiality on the part of the Assessors towards any tax-payer, your Committee emphatically declare that so far as their investigations have gone, there is no evidence to sustain and no grounds for such a charge. In this direction we would call your attention to the fact that in the increase of values of business property presented in this report, seven out of the twelve pieces of property cited are owned by one man, the largest property-holder on the street, and the name most frequently associated with the suggestion of favoritism on the part of the Assessors. These properties were assessed in 1897 for \$47,000, while in 1903 the valuation was \$94,000, an increase of over one hundred per cent., while the increase on the whole number cited has been only 56.58 per cent., a fact which ought to end all criticism of the Assessors in this direction.

In conclusion, we wish to express our appreciation of the courtesies extended to us by the Board of Assessors in our inquiries, affording us every facility for our investigations in a spirit of helpfulness which has been of great assistance to us in the prosecution of our work.

Respectfully submitted,

FRANCIS W. DARLING, LOEA P. HOWARD, EDWARD S. HATHAWAY, ALBERT DAVENPORT, GIDEON H. HASKELL, Sub-Committee.

Hyde Park, February 23, 1904.

Adopted by unanimous vote of the Advisory Committee at its meeting, February 23, 1904.

W. E. NORWOOD, Clerk.

## SCHOOL CALENDAR, 1903-4.

#### FIRST TERM.

Begins Monday, Sept. 7th; ends Friday, Dec. 18th. -15 weeks.

#### SECOND TERM.

Begins Monday, January 4th; ends Friday, April 1st. - 13 weeks.

#### THIRD TERM.

Begins Monday, April 11th; ends Friday, June 24th. - 11 weeks.

#### CHRISTMAS VACATION.

Begins Monday, Dec. 21st; ends Friday, Jan. 1st. - 2 weeks.

#### SPRING VACATION.

Begins Monday, April 4th; ends Friday, April 8th. - 1 week.

#### HOLIDAYS.

September 7th and 8th, November 26th and 27th, February 22d; April 1st, April 19th and May 30th.

## REPORT OF THE SCHOOL COMMITTEE.

TO THE CITIZENS OF HYDE PARK :----

In March of this financial year we adopted the plan of presenting original bills to the Town Treasurer as vouchers for money paid instead of presenting, as heretofore, orders of the School Committee, so that receipted bills are now on file with the Town Treasurer instead of with this board, as formerly.

The School Board recognizes the necessity of economy under present conditions, and is endeavoring to avoid unnecessary expenses of any kind. A committee of thirty-five, made up of certain town officials and others interested in reducing the tax rate, appointed a sub-committee of five to examine into the expenditures of the school department and estimate the necessary expenses for the ensuing year. The School Committee, believing that good citizenship is best developed by a judicious economy, and desiring to co-operate with a movement intended to promote the welfare of our town, gave this committee of thirty-five and its sub-committee all the information in its possession and assisted them in every way. The sub-committee prepared and submitted to the committee of thirty-five a written report and favored this board with a copy. This report was accepted and adopted as the recommendation of the committee of thirty-five. Their estimate compels frugality in all departments, the closing of one school-room, at least, dividing the pupils among other teachers, requiring teachers to have more than one grade in a room in more cases than at present, and dispenses with the industrial school altogether. The intention is to work a reform in all departments of our town government. No claim is made by this committee of thirty-five that the

school board has not been economical in its administration, but they feel that parents, pupils and teachers should be willing to work together for the public weal, to reduce rather than increase their demands, to treat our schools as a just man treats his family, and cut according to our cloth. We place our recommendations on this basis,

There have been numerous requests for increase of salaries, some of them having merit, but we do not recommend any increase in the present schedule of salaries for the ensuing year.

Year before last, we favored the putting in of toilet arrangements at the Grew School and connecting the same with the sewer, and last year we made the same recommendation relating to the Fairmount School. Appropriations were made and the work was done. The four schools not thus provided for at the time the work was commenced on the Grew School doubtless all needed immediate attention, but the policy of the school board was to spread the expense over several years in order to avoid as much as possible an undue increase in the tax rate. We, therefore, recommend that toilet arrangements be put in the Greenwood School, that the same be connected with the sewer, and that the expense be met by appropriating the sum of \$2,000 from the amount of fines collected from defendants in criminal cases, and by taking the balance out of school incidentals. This is exactly the course pursued in relation to the Grew School.

We expect an increase in the number of school children, and naturally that would require more teachers, but we will try to get along with the present number, and simply ask the teachers to do a little more work for the same pay.

Our evening school is doing good work and reaches a deserving class. The attendance is on the increase and causes an addition to the estimated expense. The industrial school, also, did good work this year, but as the committee of thirty-five citizens says, "The present financial condition

.

of the town does not seem to warrant its continuance," we make no mention of an appropriation for it.

It may be interesting to note that the appropriation required to meet the maturing bonds and notes issued in payment for school buildings and furnishings is \$2,000 less this year than last.

In order that our citizens may all know definitely, and before the appropriation meeting, the opinion of the school board relating to appropriations for school purposes, we have decided to depart from our usual custom and place our recommendations in our annual report.

We recommend that the town raise by taxation the present year for current school expenses the sum of \$52,200 divided as follows:

Salaries and fuel,	\$42,500 00
Incidentals,	5,000 00
Text-books and supplies,	3,500 00
Evening schools,	1,200 00
	\$52,200 00

The number of pupils in the graduating class of the High School is thirty-eight, and the number of pupils in the class which entered last fall is one hundred and twelve. If the class which enters next fall should number one hundred and fifteen or more, which is reasonable to expect, the increase may require a new teacher in spite of all our attempts at economy.

Hyde Park is fortunate in having a corps of teachers in its public schools well equipped for their work, thoroughly interested in the welfare and education of the pupils under their charge, and willing to go beyond a technical course of study and the hours required for school purposes to inspire our youth with an ambition to develop themselves and become good citizens.

Much care is used in the selection of teachers, and those believed to be best qualified are chosen. It is true that nearly every year sees some departures to more fruitful fields where the salary, if not the opportunity for usefulness, is larger. We cannot afford to become the rivals of some of our more wealthy neighbors, but we are always able to fill the places of the departed with new teachers of equal merit, it may be younger and fresher from the Normal school or college but full of the enthusiam of youth and the purpose to prove themselves worthy.

Our schools are in excellent condition, and those most familiar with them are emphatic in their praise. In recent years a larger proportion than formerly are taking the high school course. This is doubtless natural, as both parents and pupils recognize the fact that competition in business or professional life is, at the present time, very sharp; that girls are becoming more and more the rivals of the boys along these lines; that education, if properly applied, helps to secure positions, opens new fields of usefulness to both sexes, and gives social standing. A new high school building and other local conditions may have emphasized this tendency.

It seems wise to give our youth the best opportunities. In thus helping them, we are helping our town, and may continue to attract to our beautiful hillsides a law-abiding and home-loving people.

Extravagance is always wrong, economy is always wise, but we think it suicidal economy to decrease our educational facilities. Rather let us be able to say to the parents whose lives centre in their children,— Live in Hyde Park where the public schools will thoroughly fit your children for their life work, for the college or for the professional school.

> WILBUR H. POWERS, Chairman, For the School Committee.

Read and adopted as the Report of the School Committee at the regular meeting of the Committee held January 25, 1904.

## SUPERINTENDENT'S REPORT.

TO THE SCHOOL COMMITTEE OF THE TOWN OF HYDE PARK: My sixth annual report as Superintendent of the Hyde Park public schools is herewith respectfully submitted.

Following is a summary of statistics, the membership and attendance based upon the returns for the school year last completed, ending June 30, 1903.

## 196

In presenting a brief review of some of the results of five years' school work under supervision, I desire at the outset to express my sense of obligation to those public-spirited citizens who have made progress possible by sustaining the hand of the superintendent of schools in public and, what may be quite as essential, in private, when the welfare of the children, for whom alone the schools are established and maintained, demanded radical changes or action which clashed with private interests. The opposite course either defeats entirely the ends of supervision or needlessly delays their accomplishment.

In 1901-02, the latest year for which comparative figures are available, Hyde Park appropriated \$4.21 to the support of public schools for each thousand dollars of valuation, Two hundred and twenty-six of the towns and cities of Massachusetts appropriated a still greater proportion of their taxable property for public education. This great annual expenditure is justifiable only upon the ground of the vital importance of providing the best possible education for the future citizens of the Commonwealth. The wisdom of the investment is dependent upon the quality of the product just as absolutely as in any other financial investment. Unfortunately, the daily and yearly output resulting from the school work of our sixteen hundred children is not readily measured as to either quantity or quality. Evidently its value is directly dependent upon the efficiency of the efforts of our half-hundred teachers to hold each pupil to the most productive activity every day and all the day. Experience has shown, further, that a system of schools will fall far short of the best possible results, and that as a consequence the money invested in them will be largely spent in vain, unless the direction of the educational work is placed in the hands of a superintendent whose recommendations are, in the main, endorsed by the school committee and to whom is entrusted the execution of the details of administration.

The results of five years of supervision in Hyde Park are, I believe, apparent to all who know our schools at first hand. The first superintendent in any town meets innumerable difficulties which yield only to patient endeavor through a considerable period. It is a genuine pleasure to acknowledge the constantly increasing co-operation on the part of committee, teachers and parents, which in so short a time has made it possible to place our schools upon their present footing with no necessity for a backward step and with a most encouraging outlook for the future.

Five years ago, while there was no disposition to depreciate the work of faithful and efficient teachers, there was a very general demand on the part of parents and others interested in the schools for increased efficiency. That this demand for better schools has been met is shown, among other indications, by the fact that the number of Hyde Park pupils in private (not parochial) schools and in schools out of town, as reported in the 1903 census, is fourteen, while the number reported in 1898 was one hundred fifteen.

Naturally there was great diversity of opinion as to the lines along which improvement should proceed. There was substantial agreement that the work of the high school should be broadened and brought into line with the best suburban secondary schools. The earnest advocates of public kindergartens were numerous and their arguments were based upon sound ideas of education. The need of effective courses in free-hand drawing under a supervisor was wideiy felt. The advantages of adding to the elementary courses such high school subjects as Latin, French, algebra, and geometry were urged. Nature study under the forms of geology and botany was felt by many to be essential to modern school work throughout the grades; sewing, cooking, and carpentry work were advocated upon excellent grounds. The desirability of each of these and of other proposed additions to and improvements upon the existing courses, considered in itself, was undeniable; but, in view of all the

conditions, revolutionary measures were out of the question and were not undertaken.

The enlargement of the scope of the high school work was imperative and measures were taken at once to bring this about. An expected and wholly desirable result of this action is the very great increase in the membership of the school. The average membership for the fall term of 1897 was 182, while for the corresponding term of 1903 it was 300. In the former year, with the limited courses then open to pupils, eight teachers carried the work easily and were considered adequate for a considerable increase in membership. With the present membership and courses twelve teachers do not allow a daily program providing for the longer recitation periods which are desirable for the best results. This remarkable increase in the membership of our high school is, from every point of view, desirable. But it was foreseen that it would render necessary the erection of a new and much larger high school building. Again, the annual expense for each high school pupil is much greater than for each pupil in the lower grades. This is unavoidable and is necessarily true everywhere; but it follows that, other conditions being equal, the per capita cost for the maintenance of public schools is relatively high in towns having a proportionately large number of pupils in the high school. For this reason it has not seemed wise, during the period of rapid growth of the high school, to recommend extensions of the elementary school work which would materially increase the cost of maintenance. The question of the establishment of a system of kindergartens and of courses in manual training and domestic science is mainly a question of cost. There is no serious question as to their value in communities where they have been given a fair trial.

A conservative course has been pursued. Without increasing the number of teachers or the number of years spent in the elementary schools, the youngest children of the lowest primary grade who are too mature to do first grade work and would otherwise remain more than a year in that grade, have been placed in a sub-primary class by themselves. In two of the grammar school buildings they have a separate room, and in all cases the teachers having them in charge adapt the work to the needs of this sub-primary class as far as possible, so that in a good measure they have the kindergarten spirit and to some extent the kindergarten employments.

Wood working and other forms of manual training presuppose a thorough course in elementary drawing and some knowledge of design, Five years ago there was practically no work in drawing in our schools. The present work under a supervisor is comprehensive, is based upon right principles, and is steadily improving in efficiency as pupils reach the higher grades with more adequate preparation for advanced work. Each year the manual training idea is more effectively embodied in the work, without adding materially to its cost, by the employment of cardboard construction, and our present grammar classes would be well prepared for intelligent and profitable carpentry work if the financial resources of the town warranted the added expense of special equipment and instruction and the extension of the elementary course by inserting a ninth grade between the present highest grammar class and the high school. A ninth grade would also make room for Latin, algebra, geometry, physics, and more advanced work in history and civics. But it is true that such extension of the grammar school work would be more imperatively needed if comparatively few of our grammar school graduates entered the high school. With an eight years' course it may fairly be questioned how far the addition of new subjects of study can be carried without undue sacrifice of thoroughness. Certainly, the older subjects should be well taught before extended experiments are made in the new; and during the past five years the main effort in the elementary schools has been directed toward increased proficiency in the familiar school subjects, and, most important of all, although most difficult to secure by direct means; toward a

more general high professional standard on the part of the teachers and, as a consequence, better school spirit on the part of the pupils and better educational results. Intelligent individualism has been encouraged on the part of both teacher and taught. A dead level of uniformity has not been sought in the name of system. A teacher's best work is his own. It is not the product of imitation and it is rendered impossible by imposing unnecessary limitations and restraints. Effective supervision is neither nagging nor constant interference. It is quite as essential to let well alone as to set wrong right.

In dealing with the elementary course of study, it was felt that in the past undue emphasis had been laid upon the formal side of arithmetic, geography, grammar, and primary reading. A change of text books in these subjects was recommended and the recommendation was adopted by the Committee for all grades using text books in geography, for grades below the seventh in grammar and for grades below the sixth in arithmetic. The new texts present excellent arrangements of subject matter and form a good basis for a progressive course of study. In geography, the learner's attention is directed to the rational element which underlies and explains the facts of location. He not only learns something of the present condition of the earth's surface, but is led to look upon this as the result of formative processes which are still at work and may be observed about him. The details of names and places and statistical information are easily forgotten and may be recovered as they are needed from reference books; but the more general ideas of relation and causation, when once apprehended, are a much more permanent possession, are of wider utility, and are less likely to be gained in after life. The new geography is a useful form of nature study. It is a study of the earth as well as of maps and classified lists of cities and productions.

In arithmetic, the children are introduced early to such subjects as common and decimal fractions and percentage through problems that are within their ability to solve, and all the subjects of arithmetic when once encountered are constantly reviewed with problems of increasing difficulty. In the higher grades all subjects are finally and thouroughly reviewed in such a way as to impress the underlying general principles and to secure an intelligent grasp of the reasons for the rules in accordance with which the processes are performed. In connection with the teaching of arithmetic, practice is given in the use of the literal notation and the equation is used in the solution of problems. In the study of mensuration, elementary geometrical ideas are gained.

English grammar is taught throughout the grades and instruction in the correct use of language is made a part of recitations in all subjects. In the first grade, the children learn at once the use of Mr., Mrs., and Miss by writing from copy their own names and the names of parents and teachers. They also learn the use of the capitals I and O, the use of the capital at the beginning of names of persons, school, and town, at the beginning of a sentence, and used as an initial in a name. They also learn to use the period with initials, and to distinguish simple sentences as statement or question with the use of period or question mark. In the second grade, the pupils begin to distinguish between the names of persons, animals, and objects talked of and their actions, as a basis for notions of subject and predicate. They learn the use of capitals to begin names of persons, places, streets, days of the week, and months; the punctuation of dates; abbreviations with the use of the period; and are taught such expressions as "It is I," "I saw," "I did," "May I," with the correction of "aint," "hadn't ought," as occasion arises in oral language, As occasion requires, they are taught the proper forms of verbs with singular and plural subjects and the present and past of irregular verbs. From the third to the sixth grades, inclusive, sentences, their kinds and parts, the parts of speech, and the rules which govern correct speech, are studied from the standpoint of language itself.

In the seventh and eighth grades, the pupils' knowledge of technical grammar is reviewed and extended.

The preceding brief review of certain features of the work of the past five years will at least suggest answers to questions which are sometimes asked in regard to the work of the schools. In the main, the ground has been cleared and excellent work is being accomplished. Some changes are needed in our courses of study; for example, the formal adoption of a method of primary reading which will more nearly represent the best work now done in our schools and in progressive schools everywhere. The extension of the elementary courses along lines previously suggested must await the time when additional appropriations for that purpose are forthcoming. Meanwhile, intensive work is needed all along the line, and the earnest efforts of all concerned will be demanded for some time to come to ensure a continuance of healthful and real progress on conservative lines.

During the past year, the interest of two Hyde Park societies in the schools has been expressed in a most acceptable manner. November 21st, the Current Events Club, to whom we were indebted last year for casts of a large section of the Parthenon frieze and of the Westminster bust of Longfellow for the decoration of the High School assembly hall, gave a reception to the teachers of our schools in the rooms of the Y. M. C. A. building. December 14th, the Hyde Park Education Society gave, in Waverley Hall, an illustrated lecture and devoted the proceeds to the purchase of a stereopticon for the High School. These empathic expressions of good will toward our public schools and their teachers is characteristic of the attitude of the townspeople, and cannot fail to act as an incentive to all who share the responsibilities of public education.

Respectfully submitted,

FRANK O. DRAPER, Superintendent.

APPENDIX.

20 Q. . . . . . . .

## REPORT OF SUPERVISOR OF MUSIC.

MR. FRANK O. DRAPER, Supt. of Schools:

Dear Sir,—The past six years has marked a steady growth in Music in our Public Schools.

The Tone work shows improvement, and pupils enjoy singing in a musical way.

Harsh and disagreeable vocal effort is rarely heard in the class room.

Sight reading receives its share of attention, and children as they reach the upper grades readily sing new music.

Some attention has been given to Theory and written work. The test papers by the pupils during the past year have shown careful attention to detail, besides neatness and accuracy. Melodic composition has been attempted, but development on this line is necessarily handicapped through lack of time.

The discipline was never stronger than to-day, and in place of indifference to music, eagerness to render lessons well animates the schools throughout the town. This condition is due, without exception, to the splendid cooperation of the teachers.

For the suggestions and many helps during the year, I desire to express my thanks to you, Mr. Draper, and to the school committee my appreciation of their generous support.

Yours respectfully,

#### B. HAROLD HAMBLIN.

Supervisor of Music.

## REPORT OF SUPERVISOR OF DRAWING.

MR. FRANK O. DRAPER, Superintendent of Schools:

Dear Sir, — The work in drawing has been continued on the lines of previous years, but more time has been given to the mechanical and constructive part. President Eliot recently remarked, "Any kind of manual training is worth more than nine-tenths of all the work in the public schools that comes under the head of arithmetic."

Many models have been made of cardboard of the arts and crafts furniture. In the upper grades, boys have taken working drawings of this furniture and with a jackknife and cigar box made the object from wood.

Progress made in the work of the primary grades was well shown at the Hemenway School. Mr. Wellington, the janitor, made a house of two rooms, complete with its windows, doors, chimney, etc., and the three lower grades furnished it, one as a bedroom and the other as a parlor. A scheme of color for each room was chosen. The wall papers were designed and painted, the furniture measured, cut and pasted designs made for portieres, table covers, sofa cushions, etc. On one floor was a rug woven on their hand looms of raffia, the other was made of wool.

Another day has been given to the High School, making my visit to the grammar grades once in three weeks instead of once in two. Work has not suffered from this arrangement except where there have been new teachers with no experience in drawing.

The extra time at the High School is showing good results, the work being much in advance of previous years. One pupil with no other instruction has made \$70 since last May designing lace work. Her first commision was for designs of \$600 worth of lace,— a responsible order, but she proved successful and now regularly designs that lacemaker's patterns.

Each year, more and more, the pupils are showing the results of their training, in applying the principles of art and design to home work.

Respectfully yours,

#### ALICE T. BOARDMAN.

Supervisor of Drawing.

#### REPORT OF HIGH SCHOOL PRINCIPAL.

MR FRANK O. DRAPER, Superintendent of Schools:

Dear Sir, — In accordance with your request, I submit herewith my fifth annual report of the High School, for the year 1903.

The enrollment in December was 316. The membership was 300. The membership by classes was as follows :

1st year,	115
2d year,	74
3d year,	65
4th year,	38
Post-graduates,	8
Total,	300

The resignation of Mr. Edwin Palmer in June lett us without a military iustructor, and it was decided to appoint a young man who could assist in the academical work, accordingly Mr. Charles W. French of Somerville was appointed. The beginning of the second year of the Commercial Course necessitated an assistant, and Miss Ida M. Wetherbee of Hyde Park was chosen. In October Miss Bessie L. Nichols resigned to care for the family of a deceased sister, and in November, Miss Margaret R. Brooks of Holyoke was elected to succeed Miss Nina E. Titus in the Commercial Course, as Miss Titus had accepted an appointment in the Dorchester High School.

Several times in past reports we have spoken of the needs of library facilities and books. The furnishing of the new building supplied the former and a generous appropiation by the Committee has partially supplied the latter; but annual additions are necessary in order to develop the various departments, and make this important side of our work effective. The appropriation this year was spent for an up-to-date Encyclopedia, History, and English books. The library is open to the pupils, under the direction of a teacher, each school hour in the week, and the teachers are beginning to do regular library work in their classes. It will take several years, however, to place this work on a firm basis.

As it was necessary to give two courses in Physics while we were in temporary quarters in the Grew School building, the Physical Laboratory in the new high school building was not furnished the first year. During the summer vacation benches were built around the room for individual work, and three large tables were placed in the center of the room for class experiments. All of these were well equipped with gas and electric outlets. A Wardian Case was constructed for the Botany Classes, and a number of valuable pieces of apparatus procured for the Physical and Chemical courses have made these lines much more objective and thus of greater value to the pupils.

Entrance requirement for College have caused much warm discussion between the secondary schools and the

Colleges, in which the Colleges, instead of adapting themselves to conditions, have acted in a most arbitrary manner. It was left for the Middle States, under the leadership of some of her less selfish and more thoughtful men, to prepare the way for uniform entrance requirements by giving examinations which when passed would admit to any institution in that section. This placed the schools which fitted for those institutions in a position to interpret their courses in a much broader and enlightened spirit. In imitation of the Middle States a meeting of the higher institutions of the New England States was called, and an organization called the "New England College Entrance Certificate Board" was formed. Each secondary school in New England was then notified that after January, 1904, no pupils would be received from any school by certificate, unless such school had received the certificate right from the Board. In accordance with this notification this school at once made a request for the certificate right. In October of this year, after our course of study, daily program, and methods of work had been thoroughly investigated, the right was granted for three years, to be renewed at the end of that time at the pleasure of the Board. In other words, the granting of this privilege in the future depends upon the character of the work done by our pupils in the different institutions. More than ever shall we be obliged to insist upon certain standards for certificates. We are now permitted to issue certificates for Amherst College, Boston University, Bowdoin College, Brown University, Dartmouth College, Mount Holyoke College, Smith College, Tufts College, University of Maine, Wellesley College, and Wesleyan University.

In most of the schools having any considerable art collection the alumni have been the donors, thus renewing and showing in a practical manner their continued interest in the school. This school is no exception. In June the Battalion of 1902 presented a fine plaster cast of the Niobe Group, and in the early autumn the Battalion of 1896 completed the frieze in the Assembly Hall with Assyrian slabs representing scenes in the reign of the great king Asshurbanipal, who reigned about 850 B. C. It had been proposed that the graduating classes adorn the class rooms, and that the large halls and corridors be supplied through miscellaneous gifts. In accordance with this plan the class of 1903 chose Room 22, and placed therein a picture of the Roman Forum, a picture of the Castle of San Angelo, and a bust of Julius Caesar. It is hoped that something will be added each year. The last of November the Educational Society voted to purchase a stereopticon for the school. In order to add to funds already on hand a stereopticon lecture was given in Waverley Hall by Chaplain Tribou of the Charlestown Navy Yard. The endeavor was so successful that the school is now in possession of a single lantern of the best make.

Thanking you, Sir, and the Committee for their hearty and generous support, I remain,

Respectfully yours,

M. S. GETCHELL,

Principal.

## REPORT OF EVENING SCHOOL PRINCIPAL.

MR. FRANK O. DRAPER, Supt. of Schools:

DEAR SIR — In response to your request I submit the following report of the Evening School for year beginning November 2, 1903:

The enrollment is as follows:	
English Department,	t <u>3</u> 8
Business Department,	55
Drafting Department,	33

Average Attendance:

Business Department,	19
Drafting Department,	22

The school was continued during the Christmas vacation, as it was thought this would keep up the interest, but owing to the severe winter weather, the attendance dropped off for a while, but has shown much improvement since.

There are quite a number of scholars who attended the school last year and are making good progress in their studies.

In the business department the students who took up bookkeeping were obliged to buy their text-books, and this has proved very beneficial, as it enables them to study during the spare time out of school.

The Drafting Department is in charge Mr. W. W. Lewis and is carried on the same lines as last year, beginning with the use of instruments, geometrical problems and principles of projection; after this, drawing from objects. Most of the work has been Machine Drawings.

The other classes have the same teachers as last year and continued along the same lines.

Yours very truly,

B. M. CHITTICK,

Principal.

#### SEWING SCHOOL REPORT.

TO THE COMMITTEE ON INDUSTRIAL SCHOOL:

GENTLEMEN—The Summer Sewing School of 1903 opened July 7, with an unusally large attendance.

The total enrollment for the term was one hundred and twenty-nine, with an average daily attendance of forty-seven, It was necessary to refuse admittance to several applicants, as the classes were too large to accommodate them.

The pupils were graded and four classes were formed, each class attending twice a week. The work was similar in character to that of previous years, although more time was spent in the making of useful articles and less on the samplers, particularly in the higher grades.

The school closed August 13, with an exhibition of the work.

Respectfully submitted,

### NELLIE M. HOWES,

Instructor.

## BASKETRY SCHOOL REPORT.

TO THE COMMITTEE ON INDUSTRIAL SCHOOL:

GENTLEMEN — In connection with the Summer School a class in Basketry was formed July 7, 1903.

One hundred and thirty pupils were enrolled during the term, with an average daily attendance of forty-eight. Several had to be refused admittance, as the classes, at the time of their application, were too large to accommodate them.

The pupils displayed much enthusiasm about the work, many desiring to attend more sessions than could be permitted.

The school closed August 13, with an exhibition of the work.

Respectfully submitted,

MARGARET E, BERTRAM. Instructor.

## CARPENTRY SCHOOL REPORT.

TO THE COMMITTEE OF INDUSTRIAL SCHOOL:

The school opened July 7th with an enrollment of seventytwo boys of average age of twelve years.

Average attendance each day twenty-seven. Closed August 20th.

There were eighty-five applications.

Respectfully submitted,

GEORGE E. NOYES.

## TRUANT OFFICER'S REPORT.

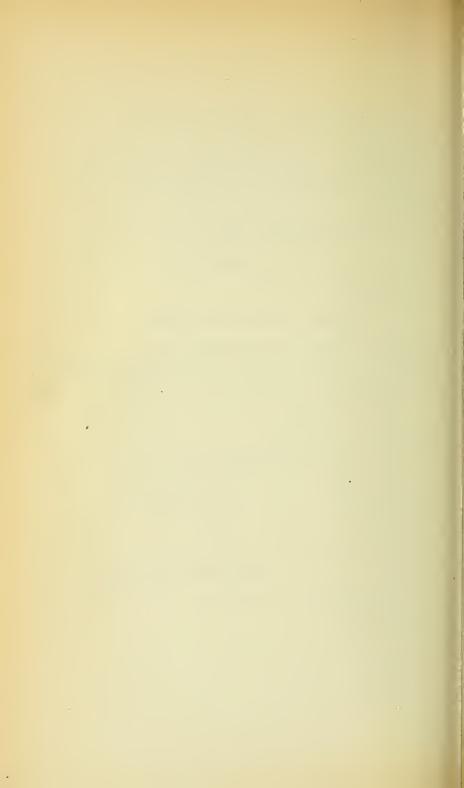

MR. FRANK O. DRAPER, Supt. of Schools :

DEAR SIR — Please find below an account of my services as Truant Officer, for nine months ending Dec. 31, 1903:

#### II. CLASS ODE

Classmates, we are now assembled, And in sweet strains let us tell Of our sorrow at departing From the school we've loved so well. We have studied long togeher, Through the days of High School life, And though often trouble met us, We were victors in the strife.

#### { Words by Patience Esther McKenna Music by Annie Lueen Caffin

But no longer will the union, Which we've fostered in these years Be as compact and unbroken, For its goal it quickly nears: Though hereafter we may wander Far from school and classmates fair,

Still we'll ne'er forget each other And the friendship that we share.

Now, farewell to our companions, Farewell to our loved High School, And the teachers who have helped us In the practice of good rules. May we profit by their teachings, And in future let us be Each a strong and worthy member Of the class of nineteen three.

## REPORT OF THE TRUSTEES OF THE PUBLIC LIBRARY.

The Trustees, in presenting their annual report, are glad to be able to congratulate the citizens on the continued prosperity and increasing usefulness of the Library whose interests we all have so much at heart.

The most notable event in our history the past year has been the purchase and deposit of a large number of books' in the Stetson Library at Readville, thus practically establishing a branch library there. For several years arrangements existed by which card-holders could order books at Readville and have them delivered by express at the library there once a week. These books were returned in the same way. For a time this plan worked satisfactorily, but the long interval which necessarily elapsed between the ordering of a book and its being received gradually led more and more people either to go without books altogether or to come to the Central Library for them.

Early in the present year, after several conferences, the following resolution was passed by the trustees.

"Voted: That a branch library be established in the Phillips Brooks Memorial Reading Room at Readville, the same to be in the custody of the directors of said readingroom; the entire expense of maintaining the same, except the transportation of books, to be paid by said directors."

In accordance with this resolution, under regulations which are satisfactory to the directors of that reading-room and to ourselves, we have been able to serve that flourishing section of the town much better than ever before, and at an expense very small when compared with the service rendered.

Through the active co-operation of many of the teachers, the library has been able to do more for the public schools than in any previous year.

The bi-monthly bulletins of the books added to the Library have been continued, and we would call your attention to the classified list of all the books purchased during the year, which forms a part of this Report.

The Librarian's Report shows the details of the year's work. Since 1897 the circulation has nearly doubled, and the price of books has considerably advanced, while the dog-tax, which was formerly sufficient for the purchase of books, has not increased in a corresponding ratio. The trustees have therefore been obliged to devote to that purpose a larger amount of the current expense fund each year.

For the trustees,

HENRY B. MINER,

Chairman.

ε

#### LIBRARIAN'S REPORT.

TO THE BOARD OF TRUSTEES:

Gentlemen — There has been no marked difference in the work of this year as compared with the previous one. The circulation at the Central Library has increased 2,788 over that of 1902. The Branch Library started at Readville in June has had a circulation of 1,172, making a total circulation of 68,060, which is double the circulation in 1894.

On December 5th we issued 492 books for home use, the largest number ever issued in one day in the history of the Library. The number of borrowers has increased 525. Through the Library Art Club, the following collections of pictures were exhibited: colored views of Switzerland; views of Japan; views of Rome; the Helen-Taylor prints; views of Paris; views of Arizona; French artists; yachts; Albrecht Durer.

We wish to thank those residents of Hyde Park who have continued to send magazines for use in the Reading Room.

Hibbet's Journal, Cassier's Magazine, Good Housekeeping, and Amateur Work have been added to the list of periodicals.

The circulation of books from the young people's department has shown an increase of nearly 2,000. The librarian in this department is doing good work in her efforts to interest the young people in the best literature. The artistic paper covers which come on the new books are being arranged in sets to loan to teachers in the public schools for use in design work. We are now taking two copies of "Birds and Nature." From one of these copies the colored plates are to be cut and mounted, with the descriptive text pasted on the back as far as practicable, and loaned to teachers for use in the schools. We are also to have Chapman's colored bird plates to loan for the same use.

We wish to express our gratification that more of the teachers are using the Library for school purposes and are interesting themselves in the children's reading.

The local papers as heretofore, have very kindly printed lists of new books, and notices of picture exhibits.

We wish to complete our file of the St. Nicholas. Many of the volumes from 1874 to 1896 are worn out. If any of our townspeople having one or more of these volumes are willing to donate them to the Library, we should be very grateful. Even when our file is complete, we can not have too many duplicates of these valuable magazines.

#### CENTRAL LIBRARY.

The Library has been open 305 days.

RICHARD M. JOHNSON, CLERK. GEORGE A. SMITH, ENGINEER.

GEORGE A. KIMBALL, CONSULTING ENGINEER.

. . . .

### BOARD OF SEWER COMMISSIONERS' REPORT.

TO THE CITIZENS OF HYDE PARK:

Your Board of Sewer Commissioners beg to submit the following report of the work done by this department during the year ending January 31, 1904.

The organization of the department, with the exception of the engineer, remains the same as last year, as shown on the preceding page: Mr. A. D. Nickerson, who had been employed by the Board as its engineer since 1897 and who previously had charge of construction under Percy M. Blake, resigned his position on May 1, to engage in work elsewhere. Mr. George A. Smith was appointed engineer to the Board on the same date.

Under the supervision of your Board there has been expended for the year ending January 31, 1904, \$12,113.40 as per vouchers on file and exhibited in Table No. 1 annexed to this report. The outstanding liabilities amount to \$130.06.

There is due from the Board of Health for pipe sold them \$69.50, and from Street Department \$27.50.

Sewer assessments have been computed and bills amounting to \$4,654.76 have been duly rendered upon the completion of sewer in each street. The value of stock on hand is \$1,694.23, as shown in Table No. 2 annexed to this report.

Your Board reports in its eighth annual report the construction of 3,710 feet of sewer. The details of such construction are shown in the following table.

#### Sewers constructed in 1903:

Total length of sewers constructed to date, 17.93 miles.

The sewers in West River street, Prescott street, and Wolcott square were built on petition of the abutters; Readville and Damon streets were built by request of the Board of Selectmen in order to have the sewer in Readville street constructed ahead of the proposed improvements to the roadway.

On October 6 a petition was received from the Board of Health requesting the construction of sewers in the following streets, viz: — Mason street, Oak place, Rosa street and Reddy avenue. This Board voted to construct sewers in Mason street and Oak place and a contract was awarded to P. H. Rooney. Rosa street and Reddy avenue were postponed for further consideration. As these streets (Mason street and Oak place) are private ways, it was necessary to file a taking of an easement in each and serve notice on each of the abutters. The sewer in Oak place was completed in December. Mason street will be begun as soon as the weather permits.

Claims for damages for drainage of five wells on Readville street and vicinity were received by this Board. Four of them were settled by furnishing water connections and one by furnishing water connections and paying water rates to April 1, 1904.

Contracts for pipe were awarded to W. H. Harlow.

The entire system has been flushed once during the season and portions of it twice.

In October a stoppage was discovered in the 20-in. sewer in Hyde Park avenue, near the Loom Works. Investigation showed it to be caused by the discharge of sand from the drainage system of the Geo. W. Stafford Co. The sand came from the pickling tank in the foundry, which was connected with their drainage system without the knowledge or consent of this Board. As the pickle used on the castings contains a considerable amount of vitriol, its discharge into the town sewer was considered highly objectionable, on account of the corrosive action of the acid upon the cement joints and the glazing on the pipe and particularly upon the iron pipe under Mother Brook. Complying with the request of this Board, the Geo. W. Stafford Co. have constructed a settling basin on the line of the discharge from the pickling tank, and an attempt is being made to neutralize the acid by the use of marble chips.

Work has been continued on the sewer assessment record plans and profiles. These plans are completed for the Central district, also for the Fairmount and Sunnyside districts and a portion of the Readville district. They will be brought up to date during the present winter.

Tabular statements are submitted herewith showing value of stock on hand, also cost of sewers constructed as per contracts for labor and material.

#### HOUSE CONNECTIONS.

One hundred and three house connections were made during the year ending January 31, 1904, with an aggregate length of 5,421 feet. The total number to date is 713; total length 35,748 feet, or 6.8 miles. The total number of persons using the sewer is estimated at 5,850. The estimated number of inhabitants within the sewered district is 10,800.

The work has been done under the direct supervision of this Board, as heretofore, at an average cost of about sixty cents per foot.

One stoppage in house connections was reported during the year.

There is due this department on account of connection made for W. C. Bramwell, at 94 Arlington street, a balance of \$6.45.

Respectfully submitted,

#### DAVID PERKINS, WILLIAM U. FAIRBAIRN, CHARLES HALEY,

Board of Sewer Commissioners of the Town of Hyde Park.

**Feb. 1, 1904**.

#### AUDITORS' REPORT.

We have examined the vouchers and accounts of the Selectmen, Treasurer, Tax Collector, School Committee, Overseers of the Poor, Board of Health, Sewer Commissioners, and Cemetery Commissioners, and find them to be correct.

We have examined also the accounts of George R. Lovering, collector pro tem, appointed by the Selectmen to close the accounts of our former tax collector, George Sanford, deceased, and find them to be correct.

During the early part of the year the School Committee adopted the single voucher system as advocated by the Auditors in their report of last year.

We are glad to report that since last July the Board of Health also have adopted the same system, so that in both departments payments are made by the Town Treasurer upon presentation of the original bill, properly approved, which original voucher remains with the Town Treasurer.

We are glad to report also that the Board of Health are to abolish their petty cash account and all revenue received by the department is to be turned over to the Town Treasurer when received.

The Board of Sewer Commissioners alone continue under the old system, and is the one remaining department which has a cash account or fund of its own. This fund is derived from sewer inspection fees, and is applied and used in the regular work of the department. We affirm again that the revenue of any department is the revenue of the town and should be turned over to the Town Treasurer.

We believe that the best interests of the town demand that the citizens keep close scrutiny upon appropriations We believe that the most feasible way and expenditures. to do this is through preferably one Auditor who shall audit all bills before payment and keep a balance sheet showing the condition of the various appropriations at all times during the year. We suggest, therefore, that the citizens consider the advisability of making a change in the Town Bylaws, whereby it shall be obligatory upon all the various departments of the town to submit all bills and orders to an Auditor for his approval if correct, after an approval by the department making the expenditure, and before payment by the Town Treasurer. We appreciate that the system advocated would make very considerable demands upon such an Auditor's time, adding, as it would, to the already large amount of work devolving upon three Auditors, the additional duties suggested. We believe, however, that the town would be the gainer thereby and that the change would effect a decided advance in the auditing of town accounts.

Respectfully submitted,

FREDERIC C. STONE, WILLIAM J. DOWNEY, FREDERICK G. KATZMAN,

Auditors of the Town of Hyde Park.

MARCH 7, 1904.
